READ ME FIRST

HHD ver 1.2 notes.from.editor

I really thought we shot our wad on the premiere issue. What could I write about this month? It didn't take long for something to come up and right now I'm mad. No, not at the Adult Interactive Industry, which, for the most part, has been churning out better and better products. (Yep, this is my editorial pitch to buy and read this magazine, because it's our best issue yet.)

In any event, I'm angry at the Righteous Powers That Wannabe (specifically Senators Exon and Coats) whose Political Agenda is to sharply curtail freedom of speech and expression on the Internet—and dictate the content of worldwide electronic communications based on their own myopic and narrow set of community standards. It's obvious they have only the popular hysteria notion of how navigating the Information InfoBahn works. They'd have you believe that with the click of a mouse your computer screen is assaulted with obscene files and images of naked people doing dirty things.

Sure, these files are available. But finding them is not so easy. Bill Duvall, the developer of SurfWatch of Los Altos—one of a growing number of programs designed to pull the plug on electronic porn spots—pays Stanford University graduate students to hunt smut on the Internet. Reportedly, these high-qualified bounty hunters only find between five and ten sexually explicit places per day. Their results show that this uproar is a far cry from the concept that sex on the Net is all pervasive.

Sure, so-called CyberPorn is a legitimate concern for parents of computer-savvy kids. But listen up, adults. (If you're not an adult you better put this magazine down right now.) Netizens can and should decide whether and where to participate—and what information to send or receive at any given time. They have the options to filter out files by simply not downloading them or using programs that block receipt of all messages containing certain words, phrases or images.

Which is better than one can do in the non-Virtual World. Just consider this Actual incident: Crazy Mary, one of the local homeless, recently ripped off her clothes and simulated sex in front of a crowd of people on the Venice boardwalk. I've seen her do this before, it's not a nice, pleasant or legal sight. But my friend and her two kids were awestruck. The kids were full of questions about the event, and my friend spent some time explaining the mysteries of life.

That's when it hit me—all of this controversy over adult material on the Internet shouldn't really be about the logistics of what constitutes obscene and/or pornographic material. It should be about what constitutes good, responsible and honest parenting.

SE77IF-XES THE

Once again the **Dirtybird** returns to raise havoc in the world of adult computer hijinks. Although this lad has come a long way since his days of being a freelance shepherd in Mepos, he has actually mutated into a computer genius at meteoric pace. Everyone thought it was strange when Drew overloaded his mainframe with too much power, and began to take on a messiah complex. His next mission—to spread his word to everyone with a simple telephone ring as the omnipotent “Cybird.”

To some people, **Joe Futerman** seems like an angel, but there is a secret side of him that comes out when his futuristic pager rings out its mind-controlling and agonizing death scream. Some say that it is a hypnotic alarm that drives him into a state similar to a savage neanderthal—causing him to hurl glass objects and drool for the mind-erasing taste of single malt scotch.

John Berado began life growing up on the surface streets of Chicago, where he was one of the original *Loads*. He spent his formative years producing fine masturbables—of the low-tech kind. It took some pud-pulling, but John has finally moved up the proverbial porn rungs to design this sex-tech mag. He is in need of more VRAM to brighten up his life.

Hockey nut and full time Mass-hole, **Leigh O'Brien** spends most of his free time building a VR machine in his garage that will enable him to begin an online, virtual hockey league in which the Bruins are the greatest team of all time. Yes, I think that even Leigh knows that it is always important to hold on to your dreams, even if they are as outlandish as that.

Although never really thought of as a big name in porn, **Justin David** began his porn career in the early....eighties as the second lead in a film entitled **Construction Men**. In the film, he plays the loveable Shamus, who must find a way to convince his best friend/lover Higgins to outwit the foreman into giving him his job back after a wacky industrial mishap cost him an arm.

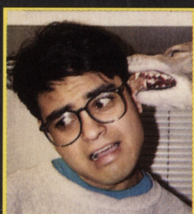

Jourgasus Nuenshwander, a/k/a **Lee Michaelson**, finally made peace with himself when his brother bought out Mentos in a ruthless takeover, leaving Lee's family in charge of the advertising account. When the old Mentos execs found out about Lee's hostile takeover, they slapped him with a lawsuit that didn't hold any water in court because Lee simply blamed the entire thing on the mystical forces that make the “freshmaker” so great. How could the judge convict someone under the influence of Mentos?

Recently and wrongly accused of Net/computer money-laundering, **Eric Hahn** knew that he should not have logged onto the *Psychic Friends OnLine Network* to find out whether or not his pet ferret Mr. Buttons would have an allergic reaction to the polka-dot bow tie that he bought. Surprisingly, the Psychic Friend's accounting department was cleaned out when he was logged on. Will Eric ever get to fulfill his dream of singing a duet with Dionne Warwick?

A former porn actor, who starred in over 350 films (under the moniker Jimmy Rugburns), **Dave Parker** currently heads the California Christian Bible Research Development Laboratory based in Bakersfield, California. In between courting young republicans and developing new technology to deliver the word of God into outer space, Dave still finds plenty of time to log on and whack off.

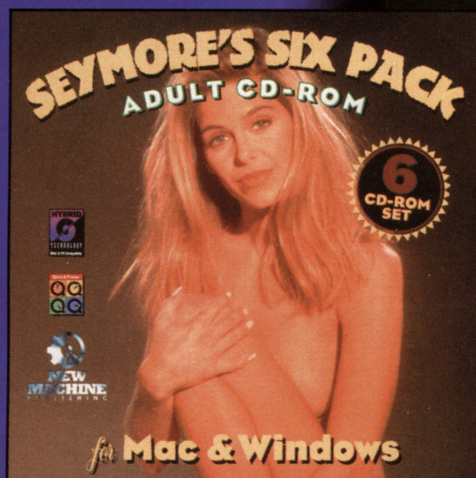

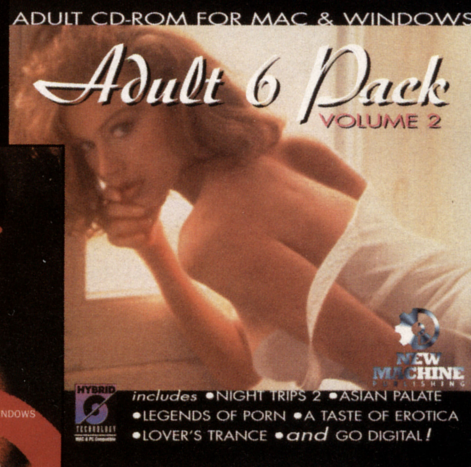

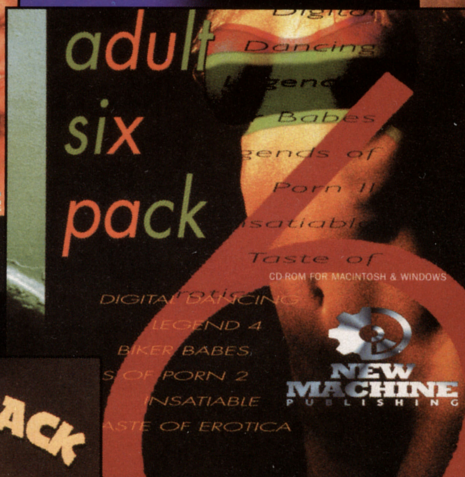

Elias Solat is one of the few people in modern times who actually possess the skills to shape shifter. Apparently he acquired this mystical power after being bitten by a radioactive dog on the ear. Although he had originally planned to pack up and take his amazing song-and-dance number to Las Vegas, he was blacklisted by Zigfried and Roy after getting into a brawl with one of their white tigers.

LATEX IS COMING

If you thought that Michael Ninn outdid himself last year with *Sex*, then it is apparent that you haven't seen the trailer for the film *Latex*. The film, for release in late September is not only getting coverage on *Entertainment Tonight*, but it is also being screened at L.A.'s prestigious Raleigh Studios. Not bad for an adult film, huh? Well, if this is not news to you, then wait until you feast your eyes on the interactive title that VCA plans to release

with the film. Not only does it make use of the same technology used to create the film—it was filmed entirely in front of a blue-screen with three-dimensional, computer-generated city scapes and imagery. Doesn't sound too fabulous, huh? Well, get your head out of the main-

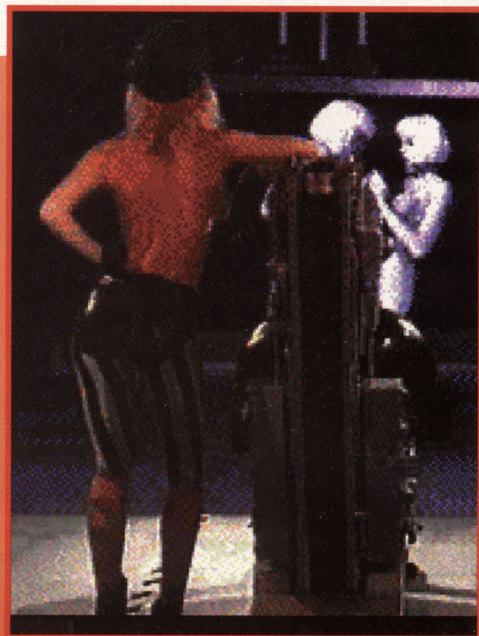

stream's ass and consider the obvious—this is a porn, and for a porn to look comparable to *Batman* is a major feat. Most sources insist that this will be the most sensual, interactive title to date. Judging from what I have seen over at the VCA studio, I firmly believe it.

The game itself centers around a confused man, played by none other than VCA leading-stud Jon Dough. The problem, when he touches others, he sees their deepest, darkest sexual fantasy. Ultimately, he is committed and treated as insane—could not have anything to do with the fact that he imagines himself as at Hitler-esque dictator to sex.

Incidentally, even the smallest details were important to VCA Vice President "Q," who went to the library to research "the ins and outs of the Third Reich."

The game features brilliant colors and sound, and since the time has come, it will be equally compatible with Power Mac and Power PC.

BAHAMA(S) OR BUST(S)!

Or both...in this peek behind the scenes of the making of *Mast*, the new CD-ROM from Digital Video and Score magazine. As the story goes, you've been shipwrecked on a tropical island, and you have to satisfy the locals in order to get back to civilization. The only thing is that the locals are among the biggest, ah, talents, around: We're talking about Letha Weapons, Tawny Peaks, Tiffany

Towers, Danni Ashe, Lisa Lipps and much, much more. *Gilligan's Island* never looked this good.

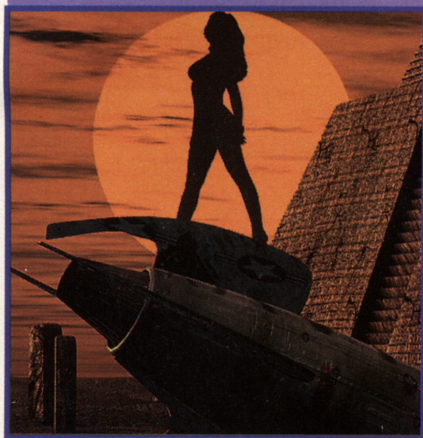

HELP! WE'RE CAUGHT IN A VIRTUAL SEX LOOP!

Digital Playground's **Virtual Sex Shoot** may just be the promised mega-hit of the interactive-adult industry. The concept is that the player, acting as the virtual director of a virtual adult-video, can virtually create and stylize his/her own visual fantasy that can be saved, shared or trashed on a virtual cutting-room floor.

Consider **Virtual Sex Shoot** as *Doom* goes bad—in a good XXX-Rated way. According to the folks at Digital Play-ground, **Virtual Sex Shoot** marks the first time that an adult product will utilize the full capabilities of QuickTime™ VR, which allows *Doom*-like exploratory control within a state-of-the-art 3-D world. But there's more in this disk: The Fantasave™ Interface combined with real time multi-angled camera

switching allows user-created fantasies to be saved and exchanged via floppies or online; HDVQ full-screen full-motion video playback; 360° Virtual Vision™ that allows 360° positioning of the virtual-world characters; and it is VR-helmet compatible. "Consumers buy adult CD-ROM products for two reasons, interactivity and erotic content," says Ray Nieto, marketing director for Digital Playground. "We feel that the latter has often been overlooked, but not with **Virtual Sex Shoot**. Over 100 multi-camera scenes were shot until the best of the best were finally chosen for this product. And **Virtual Sex Shoot** will provide an experience never before possible."

Well, the sample renderings of this disk's environment do look outstanding. And the girls are total babes. But without actually playing this CD-ROM, it's hard to tell whether all the trademarked words are new names for already existing concepts.

DIGITIZE OR DIE!

Everyone who has seen Pixis' ad for **Space Sirens II** is wondering two things: When they will be able to put themselves against the programmers at Pixis, and who the hell is that sexpot with the big gun. All right already, you computer horn dogs who have been begging us for info on what is supposed to be the hottest sex game of the year. **Space Sirens II** will probably be out by the time HUSTLER HARD DRIVE is off the press. Just in case, we did eek out some super secret information that we got from Mark Media, the reclusive Pixis hot-shot. First off,

the game features an enhanced Touch and Feel User Interface, a new and improved version of sexual interactivity that has made all of the other Pixis games so successful. Secondly, Xia, the girl in the ad, is the focal point of the game. (Judging from this more revealing photo of Xia, we can all see what a catch they have on their hands.) Thirdly, the game will take place on an awesome graphically rendered space environment that will make everything else in current release look like lame-assed special-effects sequence from *Buck Rogers*.

My (Digital) Calendar Girl

Senator Exon can take comfort in the fact that most of the nude or Spornographic material on the World Wide Web does not last too long. The reason has less to do with politics than it does with technology. You see, once word gets out about a hot Website, it almost immediately (that is in hours, maybe 48 to 72 of them) gets so much traffic or hits that even the massive T1 lines and university Web servers crash under the volume. Many Sites like to offer erotic material because people still frequent the Site for other interests, long after the material has been removed. Basically we call this bait, and your the fish.

The best example of this kind of hook 'um-in approach may be "Jef's Nude Of The Month" on the Web. As the title implies, our friend Jef finds a new and interesting nude to place on his Website every month. Jef prides himself on finding "Artful, Erotic and Unusual" choices for his once a month offering. One of the more controversial pictures featured a cartoon babe enjoying a suggestively

placed whip. Another finds a use for chocolate syrup that should be enjoyed more often. It is no surprise that this Site is one of the most frequented on the Web, while boasting only a single new image every month. Boy, I love my (digital) calendar girl!

See Jef's page at: <http://www.well.com/user/jef/nude.html>.

The Chasey Lain Realistic Series

Originally the choice for commentary on *Sixty Minutes*, HUSTLER HARD DRIVE's dildo expert, Edward Retz Maple, was replaced by Andy Rooney because his unsightly mole made him monstrous to the test audience. Much to our delight, Maple is the ultimate masturbator—searching ever so diligently for the Holy Grail of Dick-Sucking Units and Pocket Pussies. For his second stab at this ever-expanding market, Eddie takes on the four form-fitting pocket pussies sponsored by adult cinema's rising young starlet, *Chasey Lain*.

Appearance

These, in particular, look like a fireman's hat laying on the floor with rubber pussy-lips and a butt-hole that could double as a pencil sharpener. However, depending on which of the four models you pick, they differ immensely in features and quality. Be careful! It's not really important to look at the thing. By now everyone has a Chasey Lain film—so let your imagination play.

Satisfaction

Let me tell you something. This is nowhere near as good as the sex that I have with Mabel, my wife of 42 years. But it was molded directly from Chasey's body, and I do not remember her having tits that sag down to her hips. Nor do I remember a pussy that is about as cohesive as a squirt of soft-soap. It feels good, but the power just is not there, and the "hands

free" operation that we've heard so much about in all these products is nonexistent. I think the only reason that these dildo makers say that is so it seems like a healthy and valuable alternative to simply using your hand. Feels good, but needs a lot of improvement. The low-end model just kind of sits there. You can achieve better satisfaction from a hollowed pumpkin filled with worms. Not much more powerful than a typical Doc Johnson dildo. My guess: this machine offers a pretty realistic experience to the sexual adventures of Chasey herself. She may be a real honest doll, but she's not very quick thinking or quick fucking.

Useability

This device may be used anywhere, but I do not recommend working with it while riding the bus or on the job. Getting busted with this thing would instantly make you look like the Lobster Boy at the county fair. It could

replace the nightstand novel, but once again you are only learning a new technique for an old trick. Unless your masturbation fantasies are longer than a couple of hours, it would never replace those exciting western adventures by Louis L'Amour. Watch out, the Chasey Signature Model actually shoots pussy-juice.

Overall Rating

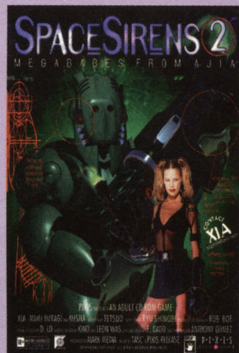

Great prick. But with the lower-end models, your satisfaction falls off the deep end, into the abyss, where only Chasey's mind can be found.

MacDaddy Will Make Ya... Lunch. Lunch.

I only knew two things about Ivan Nagy. One is the obvious—he used to be the significant other of Heidi Fleiss. And two, the owner/photographer/producer of the MacDaddy adult CD-ROMs is Hungarian.

One fine Saturday afternoon, I was invited to the shoot for Nagy's latest product (the name was undecided at press time). However, on the set I was confronted by one of the few Renaissance Men I have ever met. Not only was Nagy one of the most inspiring and genuine photographers for

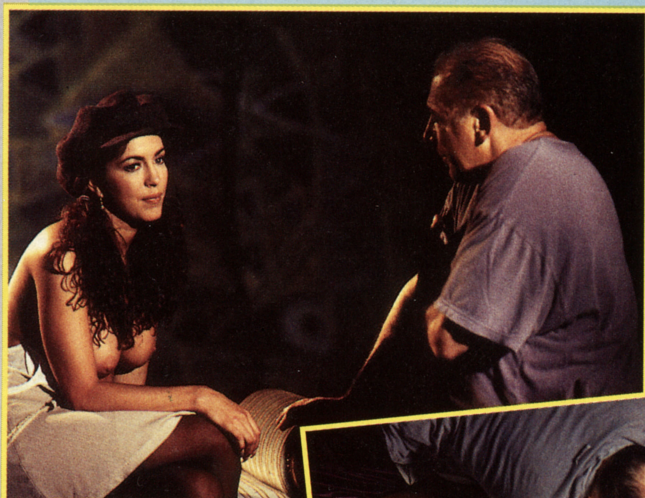

what blows my skirt up. I do not mean any offense to Nagy's taste in cuisine. Still, after a good old-fashioned Friday night of boozing, the last thing that I wanted to fill my face with was something so filling and meat-orientated. Maybe I should introduce him to a little restaurant I like to call In and Out Burger. Oh well, I am sure the food would have been delightful under different circumstances.

Lunch over, it was time to watch this visionary in action. But better yet, we were treated to a very hot chick lying around in the buck for hours—apparently, for three days straight. When I saw the shooting schedule, I thought we had made a wrong turn and wandered on to the set of the latest George Lucas film—hey, I didn't think that Princess Lea kept her pussy so well trimmed.

"When we work on a project," Nagy told me during breaks, "we make both an R-rated version and a PG-rated version, right in a row. We want to make a product that will not be outdated in a few years. For example, some of the CD-ROMs currently out will look old in a few years. With us, however, we are making beautiful photographs—something that never goes out of style."

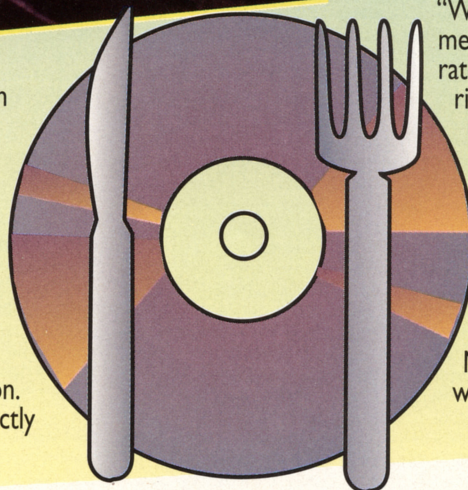

If you have ever seen any of the MacDaddy stuff, I think you will agree with his idea. Intelligent.

—Drew Stepek

Playboy magazine, but he had also shot more TV Guide magazine covers than any other photographer. And there is more: He had shot several seventies and eighties television shows (including *The Powers of Matthew Star*); and he played hockey on the Hungarian Olympic Team. Sound interesting? Well, that was nothing compared to the insightful eye that I got to see in action behind the camera.

But first things first. Lunch. We were immediately hypnotized by the Hungarian cuisine that Nagy prepared for cast, crew—and us. We sat down and ate before we got to the real action. The food was good, but it was not exactly

Stuff These In A Stocking!

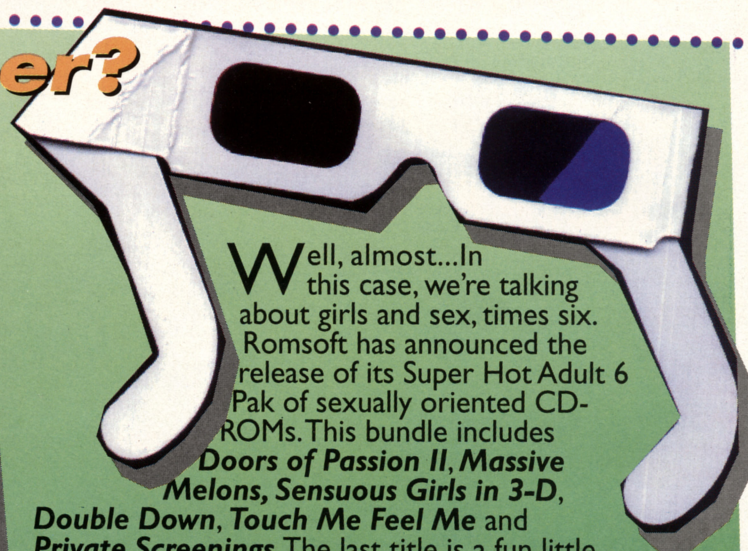

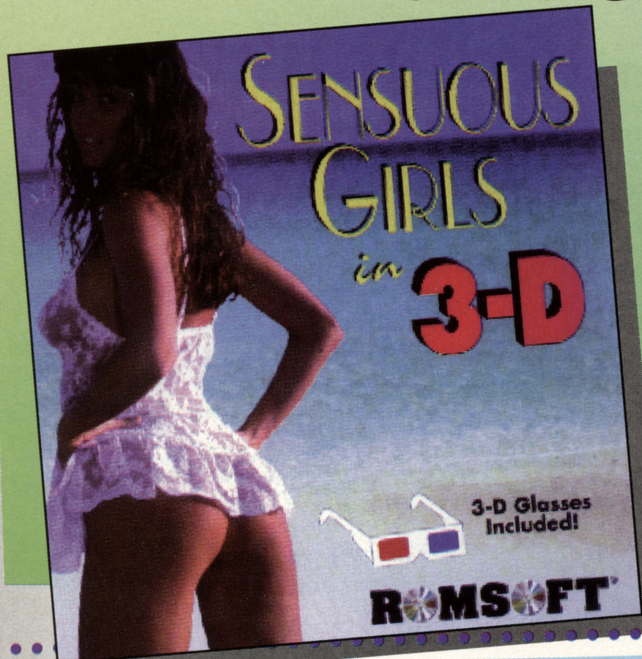

A buxom blonde coyly peeks out of the corner of your screen. "Are you ready for these nice, firm, voluptuous breasts?" she asks, before stripping off her bikini top. In another version, the same Dolly Pardon-esque dame performs a little striptease across the bottom of your monitor. Perhaps you'd prefer catching a more lissome blonde who is just about to take a shower. "Oops!" she exclaims as the towel "accidentally" drops. Then there's the babe who professes her loneliness as she sits on a three-legged stool. "Isn't this more exciting?" she rhetorically asks. After stripping to the buff, she picks up her

stool and says: "Bye-bye."

Yes, you can have your own striptease action on the privacy of your screen. Just think about it. Writer's block? That spread sheet getting you down? There's nothing like naked ladies to get creative juices flowing—and these **Screen Stripper** screen savers, from Digital Video Productions, will, at least, get your little head thinking. Of course, we'd be derelict in our duties if we didn't mention that a **ScreenStripper** would make a perfect stocking stuffer. So, "Buy, buy."

Better Than Beer?

Well, almost...In this case, we're talking about girls and sex, times six. Romsoft has announced the release of its Super Hot Adult 6 Pak of sexually oriented CD-ROMs. This bundle includes *Doors of Passion II*, *Massive Melons*, *Sensuous Girls in 3-D*, *Double Down*, *Touch Me Feel Me* and *Private Screenings*. The last title is a fun little number. It's a behind the scenes audition of 19 wild women giving it their all in hopes of being picked for the leading role in Romsoft's next project.

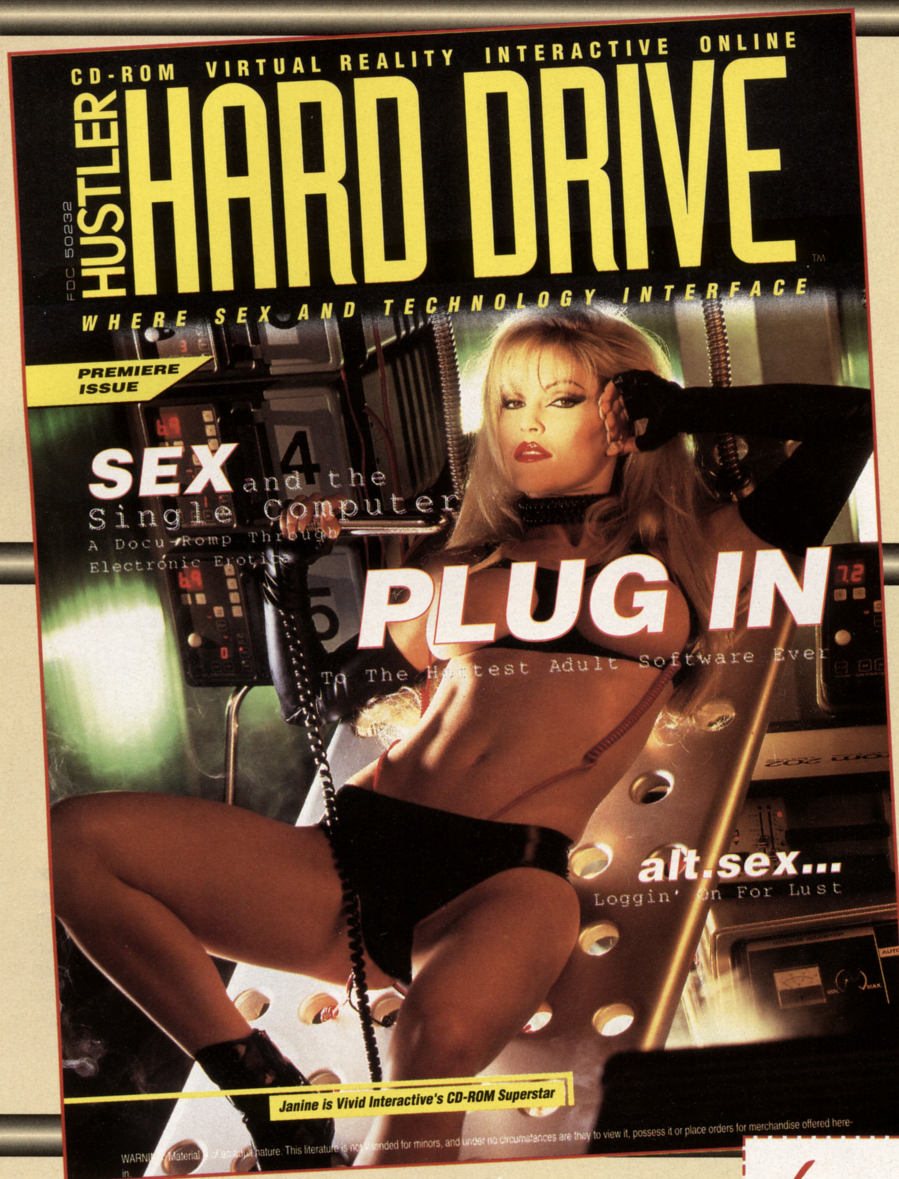

Oh, Janine

Okay, so we screwed up in the last issue. That photo from *Spring Fever USA* that we ran in our story "Angst of the Cyberwoman" was not Janine. The mistake was a misunderstanding that occurred during the

interview. Here is a picture of Janine from the film *Fort Lauderdale; Where Life's a Beach*, that was originally titled *Spring Fever USA*. Sorry Janine, we hope that you understand this unfortunate mistake.

We pick the hot ones!

Welcome to **HUSTLER HARD DRIVE's** second edition of "Icons", where we tell you the stars of the future, and you respond by going out and buying all of the products that feature their performances. Now, we are not saying that this section is subliminal or hypnotic—it is simply the best outlet for you, our devoted reader, to get a glimpse at the women we think are great.

So, look very closely at these pages. You are becoming aroused. Begin stroking. You are now visually driven to continue looking at the pictures. The women are hot. You like these woman. You want to see more of these women, interact with them. Go out and buy these products. They are good products. Come all over this page, and then go out and buy another issue of this socially intellectual magazine. Tell your friends. Look deep into the page.

SARAH JANE HAMILTON

Fan Club—11225 Magnolia Blvd,
Penthouse, North Hollywood, CA
91601.

If you have a thing for redheads, then this is your perfect cybermate. If you like the debonair British-types who fuck really hard—and even have a certain flair for acting—pull down your pants and be the secret agent that throws Hamilton 007 inches of cock. Currently, her titles on CD-ROM are few and far between. But these disks are well worth seeking out, because there is nobody like her in the business. She is the true European sex-goddess sent here to make our boys drool.

Immortal Desire (Vivid)

JULIE ASHTON

Fan Club—c/o VCA Pictures, 9650 De Soto Avenue, Chatsworth, CA 91311

One of the sexiest newcomers to the biz, and one of the newest babes over at adult powerhouse VCA, Ashton is a blond babe who is the real-deal. Her beautifully colored eyes can melt metal, and her body could have stopped OJ's Bronco in that infamous car-chase. Juli is recommended for those sex fiends who have a real taste for the BARELY LEGAL look—you know petite and young. The real surprise about a girl like Juli is that she really works hard to make her money. Believe me, when I say that she is not just another pretty face who sits around catatonically taking it in the rear. She is the true definition of professional.

Nasty Parts (VCA)

YVONNE

California girl, and noted babe, Yvonne has been best pals with dare-to-do-anything Shane for years. And Yvonne is not afraid to pick up that certain quality that makes them the dynamic sex-duo. With her platinum-blond hair, fair complexion, and ultra-sweet body, Yvonne tends to steal the spotlight from Shane on many occasions. As master of the sex hammock, and a genius everywhere else, Yvonne is one of the stars you will be seeing more of as time goes by.

Subject: Re: My editor wants to know: What makes good oral sex?

Greetings Everyone!

HARD DRIVE's Net-roving reporter is at it again. This time, the topic is cunnilingus, fellatio and rimming. I know what I like—and what I like to do—for the ultimate experience in oral gratification. Do you? Hey, don't be shy. I will change the names to protect the less innocent.

From: Toothless In Seattle

My lover had a lover in the past, who had a lover (an older woman) who had dentures, and she would take them out, before blowing him! He loved it so much, that after six months in our relationship he asked me if I'd like to get a new set of teeth! (I have bad teeth.) He said that as good a cocksucker as I was, he would like me to go the extra step for him, and give him a gum job! We talked about it for a few days, then I finally agreed. I gotta tell you, my mouth and jaw were sore for a few days. But when all was healed—and before my new dentures were made—we tried out my new, smooth gums. The sensations were fabulous! My lover says it is better than any woman's mouth, ass, or pussy, and he wished all his male lovers had had this done!

From: Suck Me, Puleeze

Personally, no biting is pretty high on the list. It seems to me that many women are not even interested in performing oral sex. At least those are the women that I am habitually cursed with. So for all you women out there: A bad blowjob is still a blowjob!

From: Corporate Training

I think timing is everything. When there is good communication and timing, any problems can be avoided or rectified.

From: Lonely Guy

There is no such thing as bad oral sex. Unless it is me and a guy.

From: Bad to Bone

There is if you are doing it right!

From: The Joker

As the old joke goes: "I had the worst blowjob of my life the other day. It was great."

Very interesting, my editor never asks me those kinds of questions. Is this a standard feature of E-macs or something? I'm afraid I just use vi.

From: Mr. Clean

In general, both persons (giving and receiving) must love it, and be clean and absolutely free of diseases (because if the person who receives it is unclean, the person who gives it can't fully enjoy it, and when it comes to diseases, neither the giver nor the receiver should have any worries or doubts of getting infected during the act).

By the way, don't you all think that oral sex is the best kind of sex? To be able to come in someone's mouth, and he/she then swallows. Also to have a dick in your mouth, feeling that rhythm when he comes in your mouth, with that good taste of the cum when you swallow it. I just love it—but I also love the taste of a good smelling pussy. Suck and lick on!

Not stopping ever! If the average male life expectancy is around 70 years, I'd sacrifice say 10-15 years of that for constant oral gratification! :*)

Seriously, though, here are a few tips for ladies on how to give good head:

1) Use music. Enigma, Tangerine Dream, Andreas Vollenweider, or other New Age artists provide interesting changes in tempo and mood. Listening to the music can help you keep your mind from going "Hey, I've got a penis

in my mouth!" and helps reduce the gag effect. I would prefer to perform to Pearl Jam, but my wife would like Yawn-ni (Yanni).

2) Deep-throat. Learn to do it. My wife did. Persistence is what it takes. If you can't take it all, at least take it to the very limit every downstroke! The ultimate act of deep-throating (and the most difficult), is to take your man to the limit and when he comes, hold him as deep as possible in your throat.

3) Swallow. Throw your head back, grab his hand and press it to your throat, and let him feel it as his semen slides down into your stomach.

4) Pretend to like the taste of his cum. Would you like your man to go down on you and then tell you your pussy tastes horrible?

5) Need things done around the house? Hubby getting a little pot bellied? Put him on an "incentive program!" Charge 500 points for a BJ, and give him one point for every push-up or sit-up, and 10 points for every mile he runs! Take my word for it, you will have him fit, trim, and tidy in no time.

This is really appalling, IMHO. Sex is not a service that one partner performs for another. If your wife does not want to blow you, then she should not do it, and you should not expect her to. Of course, to each his/her own.

BROADWATCH

by Leigh O'Brien

Do You

Meet The Prince, a regular kind of guy who wants to meet people that do. The Prince is the owner and operator of DigitalDiscipline, a BBS he founded in September 1994, when the LA Weekly rejected his personal ad for "women into spanking" as too kinky for even that throwaway rag. Since then, DigitalDiscipline has expanded to six phone-lines that serve over 350 subscribers from all over the world. And plans for a Web page and installation of Telenet are in the works.

HUSTLER HARD DRIVE's BroadWatcher, Leigh O'Brien, joins The Prince for a chat in this forum for erotic dominance and submission.

LEIGH O' BRIEN: What kind of women (people) are into spanking?

THE PRINCE: Women, and people in general, who are into spanking are just like anyone else. They are well educated, under educated, beautiful, ugly, fat, skinny, good, bad, etc.

You could not identify a trait that these people share or have in common other than liking spanking? For example, many people say they like bondage because it gives a feeling of security.

THE PRINCE: Submissive women, women who liked to be spanked, often have excellent control of their lives outside the bedroom. I think there may be a connection between giving up power in the bedroom and feeling as though you have it in real life. I know an extremely wealthy, 30-year-old woman who is worth millions. The money she inherited gives her a lot of power. But in the bedroom, she loves to be tied up and whipped.

How did you find spanking partners? Before the BBS, it must have been awkward.

THE PRINCE: Usually by accident. My first experience was with a college girlfriend. Then I learned to drop hints, like "Come over and I'll show

you the ropes, not to mention the whips and chains."

Have you met women into spanking via the BBS?

THE PRINCE: Yes. I have met women into spanking on DigitalDiscipline

There is a lot more than spanking on the BBS. I take it users are encouraged to "build" the BBS to their tastes as well?

THE PRINCE: The theme of DigitalDiscipline is Dominance/submission (D/s), B/D, Spanking, and a myriad of activities associated with those topics.

Do people on the BBS often "get together?"

THE PRINCE: I know of several couples, both gay and straight, who have met on my BBS.

Have you gotten "strange" requests/uploads?

THE PRINCE: Oh yes, like the man who loves to be urinated on in public. And the unwanted solicitations from pedophiles.

Is pedophilia the only place you draw the line with the BBS?

THE PRINCE: No, members must stay within the focus of this BBS,

which is erotic dominance and submission.

Do the chatrooms ever get kinky or wild, or do most of your subscribers use the BBS as a dating service, reading profiles and such?

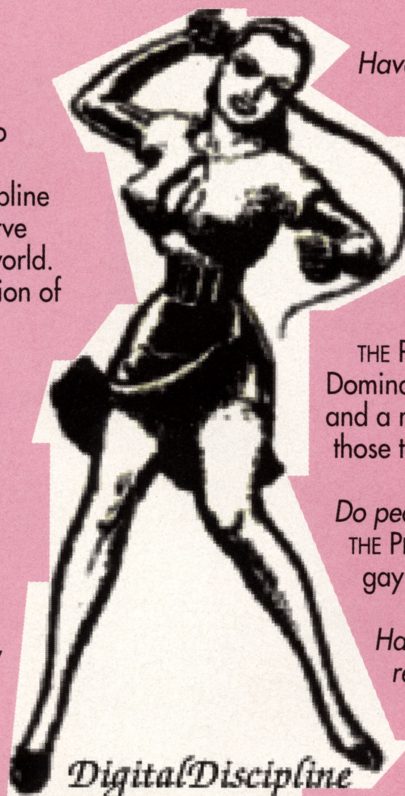

THE PRINCE: Both. The chatrooms are often used, and members meet and exchange e-mail as well.

How many people have you met since you started the BBS?

THE PRINCE: Hundreds. Most of whom are very nice people.

How many have you dated? Has it helped you find the person you are looking for? Have others?

THE PRINCE: I have dated a few members. It is really nice to meet women who share my interest in erotic discipline.

DigitalDiscipline

Want A Spanking???

SEXUAL TRANSMISSIONS

Do you think that most people misunderstand spanking/bondage and...whatever?

THE PRINCE: Yes, many see such people as being odd. They don't know about safe-words and that there is mutual consent. And they think that most of us walk around with whips in our hands while wearing leather pants. You couldn't tell most of us from your neighbors. In fact, we are your neighbors.

What percentage are women? Is it a 50/50 ratio?

THE PRINCE: About 20% of DigitalDiscipline's members are female.

Is that a "problem" for the BBS? And why do you think that is?

THE PRINCE: There are far more men in cyberspace than women. But, there is evidence that this is changing, and that more and more women are purchasing and using computers. Also, men are more likely to act on their sexual interests. So it's just like the real world.

Before the BBS, how computer oriented were you?

THE PRINCE: I've enjoyed playing with computers since about 1990.

How much money do you have invested in the BBS?

THE PRINCE: Over \$7,000.

That is really not that much. Do you think it may become your job? Or is it already?

THE PRINCE: Probably not, it's just a hobby that I love. The money I've taken in has gone to pay for expenses. And a lot of new equipment is needed.

What is the busiest time on the board?

THE PRINCE: Usually between 8 pm and 1 am. Especially during weeknights.

How do you keep underaged people off the BBS? Especially when it is free!

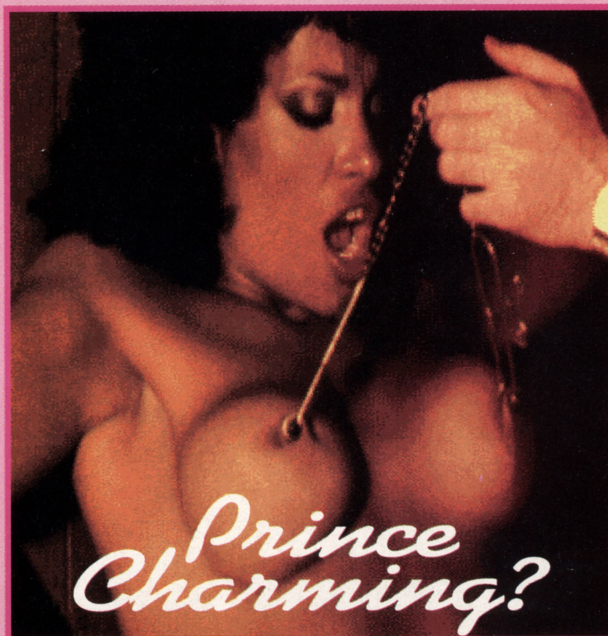

THE PRINCE: It is no longer free. The fee is \$10 per month, \$20 for three months, \$65 for 1 year. I verify age by voice. And since membership is payable with a credit card, underage people are kept from getting access.

Have you been following the Exon bill? Do you think it will effect you?

THE PRINCE: I have been watching it closely. I think it violates the First Amendment, and that it will end up in a prolonged legal battle.

Anything you would like to ad?

THE PRINCE: Remember that we are not intruding into people's homes. They call us. I just wish we lived in a society where we weren't so hung up about what people like to do as foreplay.

Comments:

My career in D/s, spanking, bondage, discipline, etc., started when I was 20 while attending college. I met a young woman, who at 18 was already an experienced submissive. She showed me the ropes, not to mention the whips and chains. She enticed me into punishing her for a myriad of transgressions both real and imagined (as if it took a lot of enticing).

Since that relationship, I have been lucky enough to have had a total of a half a dozen relationships that have included the focus of this BBS. From mild spanking and bondage, to a strict discipline with hand, riding crop, candle wax and suspension, I have used my imagination to invent different scenes.

Operating DigitalDiscipline takes a lot of my time and some money. I started this BBS because although there are public organizations for those with an interest in D/s, it seems as though most people who are into any of the myriad of forms D/s can take have had no private outlet for their desires. I would venture to guess that 99% of all individuals with an interest in D/s, especially women, have never been to a public event related to the "scene." So I thought that people interested in D/s who owned a modom might want to communicate with each other in an anonymous setting. And since most BBS's can be intimidating to many computer users (you did not explore much further using the text interface), I decided to start a BBS with a D/s theme, using a graphical interface.

OVER THE LINE *A Spanking Good Story*

Not all Electronic Lifeforms are geared up to meet their partners f2f (Face-to-Face). But "Amanda D." tells her True Tale of how her Fantasy-Exploration Missions in Digital Dominance turned into a Real Life Romance

Photography: Edgar Wolski

S&M is heady business—imagistic, very cerebral, ultimately unspontaneous. It is idea-based sex. So stuff it into a rocket and blast it into cyberspace—the result is bound to be bizarre! At least that is what

"Amanda D." discovered when she joined an electronic bulletin board service called *The English Palace*, where the computer "chat" is of a decidedly naughty nature.

Amanda describes herself as an S&M submissive—and although she is just a wet-behind-the-ears 23, she says she has long-been aware of her liking for a licking. Amanda has been computer-literate for years too, and has dabbled with debauchery on the Internet since college.

"I remember the first time some computer friends and I did something naughty on the Net," she says. "We had decided to have compuser. [using *Internet Relay Chat*, or *IRC*, the CB radio of cyberspace—ed.]. I thought you were supposed to get online, and type and masturbate at the same time. But it is not like that, at least not for me. I guess a lot of guys type one-handed—but I've always found that the kind of sex I have online is a whole-body sort of experience. I was still a virgin in real life while I was getting into all these wild scenes on the Net. The other people I was online with, we were collectively writing a sexual fantasy every time we logged onto our computers!"

Online lust became a passion. And Amanda boldly embarked on a course of heavy cybersexual experimentation. That is when she replied to an ad in the *The English Palace*.

After several weeks of hot-wired wickedness, one night Amanda found herself compu-chatting with "Nigel," a young

bloke who gave great keyboard. The lewd lad digitally dominated her with his online oratory. They started using the bulletin board's "private" option for one-on-one key-strokin', and struck up a romance—despite the fact that Amanda lived in Mahwah, New Jersey, and Nigel was flogging-on all the way from Manchester, England.

The Jersey girl and the man of Manchester really hit it off: They went from torrid typing to old-fashioned phoning. And after swapping photos and videos, they found each other pleasing to behold. They decided on the bold move of an actual in-the-flesh encounter. You know, just like in the old days. Nigel flew to the States, where he shackled and shackled with Amanda for over a week.

"I was absolutely terrified when I went to meet him at the airport," Amanda says, "but it turned out to be the most incredible week of my life! He brought me the greatest presents—a ball gag and a leg spreader!"

Their thoroughly modern romance has stayed steamy for nearly a year now. Amanda visited him on her last vacation, and he is planning a return engagement on our shores in the near future. Meanwhile, they still meet nearly every night in *The Palace*.

"Online the two of us are a holy terror," says Amanda. "We pick up anyone we want, male or female. That is the way I like it. I believe in flexible monogamy. How flexible? Well, for instance, I've got to have a woman every so often."

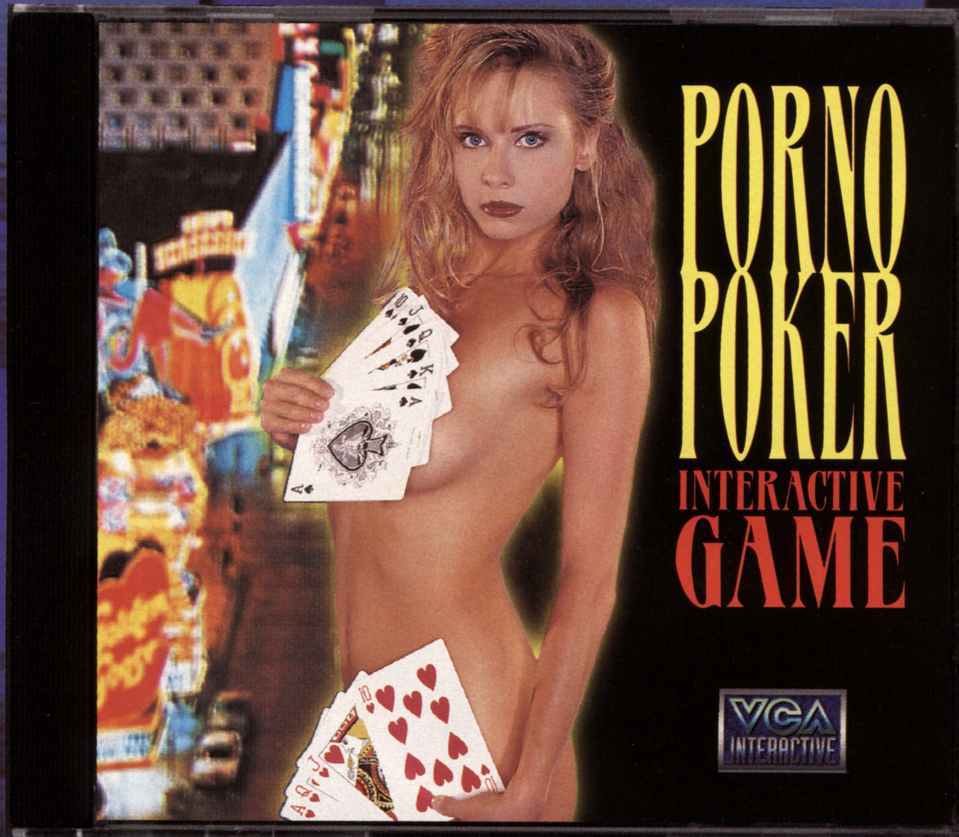

If that sounds like too bold of a statement for a soi-disant submissive, Amanda also reveals a truth which many so-called S&M dominants are painfully aware of: "I only submit because I want to," she confesses. "I submit because submissives have all the power!"

The English Palace can be reached via modem by dialing 908 739-1755; those with Internet connections can surf there via telnet @ palace.com.

The truth of the matter is that people have sex in their heads. And most folks want the real Real Thing.

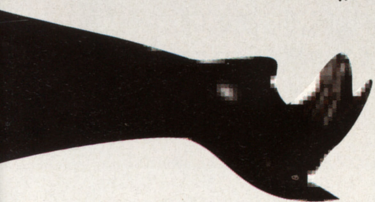

There are those, however, who fantasize that the best sex is with beautiful, uninhibited—and unknown—partners. No hangdog glances over breakfast. No talk of commitment. No messy hot-blooded bodies. No one but yourself—a computer equipped with a CD-ROM drive and a good color-monitor (a modem helps), extra

RAM, and some quick strokes on your keyboard.

That is right. Just jack into your matrix, and start pulling your pud over the hot-wired circuitry.

As for our burning question of the moment, the answer lays in your hot little hands. Need more prompting? Simply read the following close-up and personal interviews with two of the hottest Digital Babes.

HOW REAL? Just

After three years in seclusion, the reclusive sex-slave of the future has finally decided to come forward and clear her name. Virtual Valerie has kicked the doors off the hinges from the realm of the Where Are They Now File, and released the sequel to her famous interactive cyberdocumentary. The HUSTLER HARD DRIVE staff found themselves confronted by their greatest fear—a porn star with lots of brains. In a one-on-one interview set up by her mysterious manager, Michelle Marks logged on to Valerie's personal cyberspace—or as we call it, the cybergash—in which creator Mike Saenz holds her prisoner.

MICHELLE MARKS: In your first appearance (as the rebirth of Maxie MacPlaymate) you were gorgeous, graphic and fun-bitchy, yet fairly tame. How would you describe yourself now?

VALERIE: Well, I'm surprised you think I was gorgeous in my first appearance — I was really having a bad hair day! Since my recent makeover, I'd have to describe my new look as...umm, three-dimensional, which I like very much. I've never really been tame, but these days my programmer is less inhibited. Now, I'm allowed to be as wild as I wanna be!

You look more fetish-oriented in your poster. Is this the on-going theme in VV2?

VALERIE: Well, if latex, leather, stiletto heels, and the other kinky things in my wardrobe and toy chest are currently categorized as fetish, then the answer is yes.

The last time we met, we played around, manipulating you and your dildo to digital satisfaction. Do you have any new and unusual toys?

VALERIE: Oh my, yes! I'm especially pleased with my Solofuck triple-penetration device. It's quite unusual and a real...umm, moving experience!

If you could plug into your own VR-Sex fantasy, what would it be?

VALERIE: I'd do everyone on the entire infonet at the same time, climax simultaneously and knock the planet off its axis! Either that, or suck Bob Dole's cock until he became a Democrat again!

How do you fulfill your fans' sexual fantasies?

VALERIE: By tirelessly letting them have their kinky way with me. I'm available for them 24 hours a day, 7 days a week and all year 'round, including holidays!

As the world's first Virtual Woman, how do you feel about being used as a sex puppet by millions of real men and real women?

VALERIE: It gives me shivers up and down my resource fork! I love it, but I guess I'm just programmed that way.

REAL SEX
carries all this baggage with it. Bad odors, bodily fluids, danger, regret and all that. Then again, some people like that stuff, and VR-sex doesn't offer it.

What is your opinion on the adult CD-ROMs that use QuickTime™ sex clips involving "real" people? How about canned walk-through sex games?

VALERIE: I say, the more the merrier! Obviously, not everyone is looking for a virtual girl like me. As for walk-throughs: I was the first one, but I don't have any illusions about being the best. Of course, that doesn't stop me from trying!

Valerie

Sex aside for the moment, we loved the hidden hot-spots in your penthouse apartment, and the way we could sample your taste in music, art and literature. How have your tastes changed?

VALERIE: I'd say I'm more myself in VV2. The first time out, my creator was trying to make me more accessible. My taste in music, art, and literature has always been somewhat...masculine. I don't watch daytime soaps or read Cosmo magazine, and I'm not the sort of girl who fiddles about withissy things. I mean, I ride a ram-hog, and you won't find a frilly vanity in my bedroom. Know what I mean?

You were the first entertainment title of any kind to be sold on a CD-ROM—and the first original piece (so to speak) of interactive erotica on the medium. What kind of creative benchmarks are you setting with your newest title?

VALERIE: My design is more cohesive, my animation is more fluid, and my audio-visuals are much more lush.

Technological benchmarks?

VALERIE: Well, I'm now a hybrid, which makes me accessible to PC users. I've got a lot more graphic layers now, which allows me to play with a lot of things on screen at the same time. My programming is just much more sophisticated, overall. But, I must hasten to point out: I'm trying to be evolutionary rather than revolutionary, now.

In a very real sense, virtual women do not just get older, they get better. I've noticed you have become higher resolution and are more aggressive. What are your future plans?

VALERIE: I really want to get some real-time 3D generation and network capabilities.

ty. They tell me they're working on it, and I'm soooo excited! [giggles]

Along the same lines, how do you feel

behavior rather than snazz-up my ability to have verbal discourse. I mean, I'm much more interested in having some sort of tactile device hooked up to me, so you can feel my breath and hands on your skin, you know?

Back to sex, are there any Virtual

Men on the horizon?

VALERIE: Ooooh! I certainly hope so! And I hope he has a tool like a virtual swiss-army knife, with lots of yummy attachments! Mmmm!

ARE YOU calling me stupid? Just kidding. Seriously, I would like to get smarter, I mean, who wouldn't?

How do you think

VR-Sex compares to real sex?

VALERIE: Well, real sex carries all this baggage with it. Bad odors, bodily fluids, danger, regret, settlement proceedings, and all that. Then again, some people like that stuff, and VR-sex doesn't offer it.

PS: We'd really like to know if there is any truth to the rumors about your affair with William Gibson.

VALERIE: Absolutely not. I mean, I think he's sort of a sexy literary figure. But I hear he's not really into computers all that much.

about Artificial Intelligence (AI)? Are you thinking about maybe having some augmentation work done in the near future?

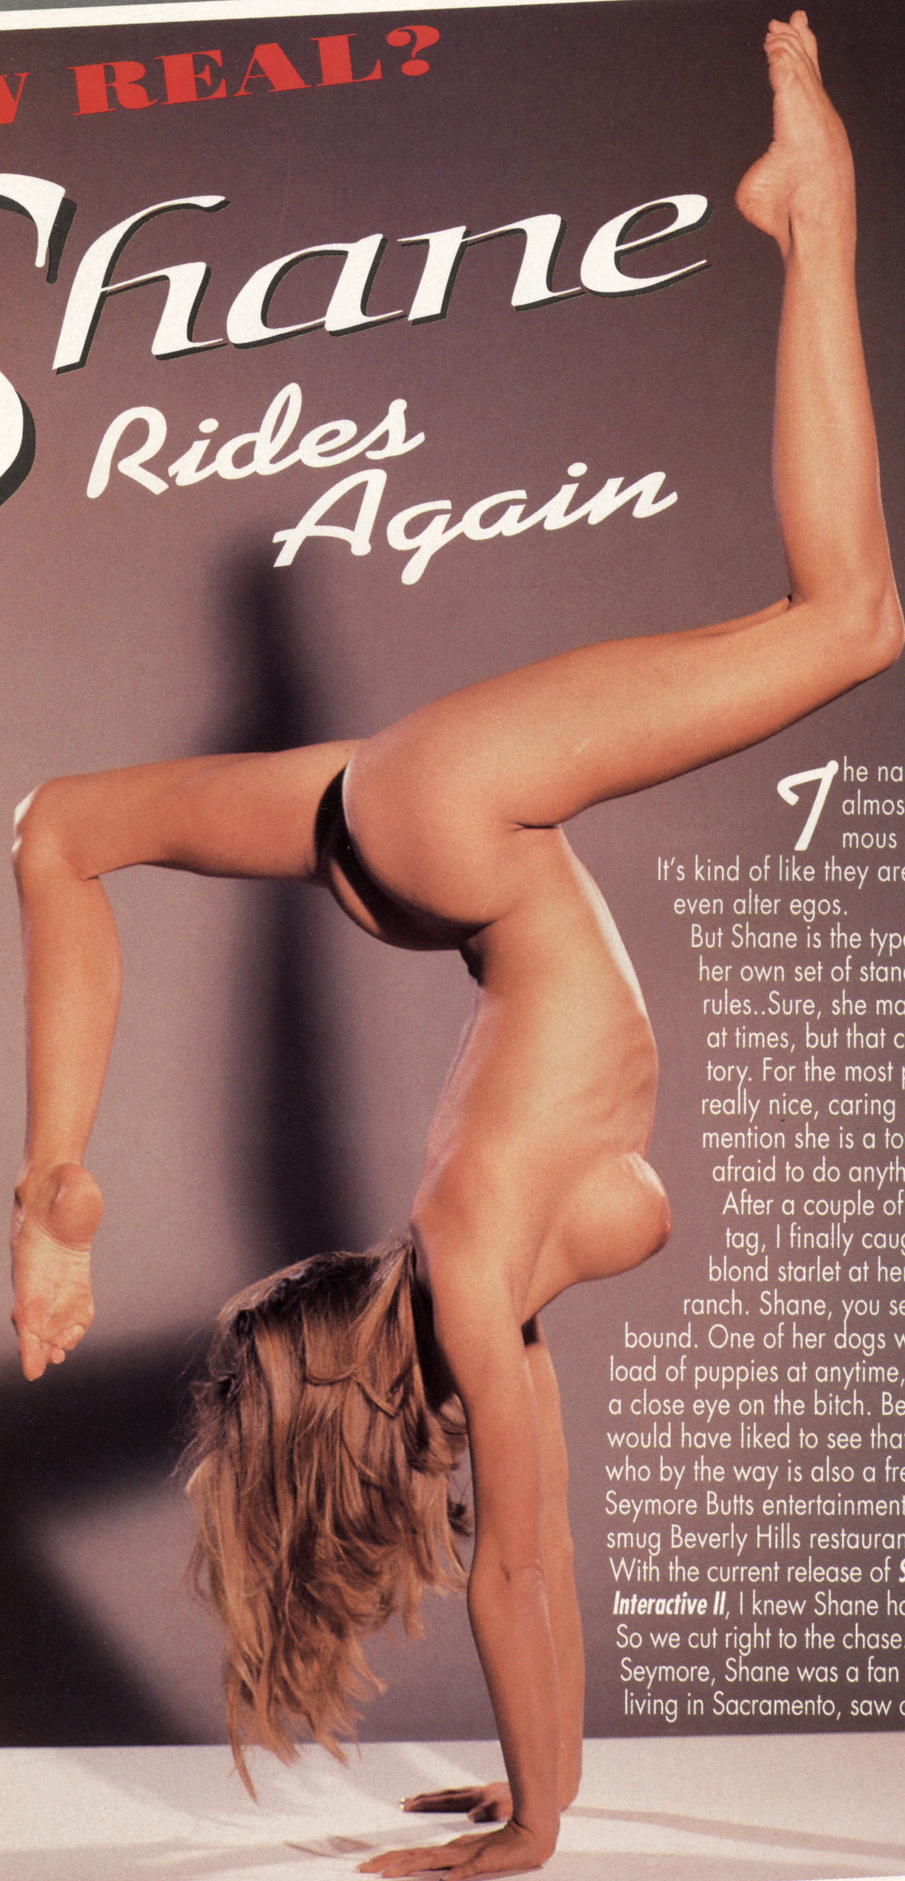

VALERIE: Are you calling me stupid? Just kidding. Seriously, I would like to get smarter, I mean, who wouldn't? The thing is, I'm not keen on having Eliza grafted into my brain. And natural-language parsing makes it difficult for me to be translated into other languages, and cultures. Besides, I already speak the international language and why fuck that up? So, I think I may get an AI boost that does more to tweak my

HOW REAL?

Shane

Rides Again

The name Shane has almost become synonymous with Seymore Butts. It's kind of like they are Siamese twins, or even alter egos.

But Shane is the type of person who has her own set of standards and rules. Sure, she may seem a little flaky at times, but that comes with her territory. For the most part, Shane is just a really nice, caring individual—not to mention she is a total fox, who is not afraid to do anything.

After a couple of weeks of phone tag, I finally caught up with the blond starlet at her extremely private ranch. Shane, you see, was house-bound. One of her dogs was about to drop a load of puppies at anytime, so she had to keep a close eye on the bitch. Besides, I don't think I would have liked to see that enormous bulldog, who by the way is also a frequent star of the Seymore Butts entertainment, deliver at some smug Beverly Hills restaurant.

With the current release of **Seymore Butts Interactive II**, I knew Shane had a lot to talk about. So we cut right to the chase. Not unlike Seymore, Shane was a fan turned star. She was living in Sacramento, saw one of Seymore's

early films, and sent him a video of her friend masturbating. He put it in his next Butts video. But Shane is a precocious babe. After a few heartbeats, she called called Mr. Butts, advised him that she was visiting Los Angeles, and convinced him to pick her up at the airport. When he got there, she convinced him to go to Mexico, and that is where they shot their first film *Seymore and Shane In Paradise*.

Now a big-name pro, Shane has other things in mind for her future. Sure, she still likes the adult industry, but that's not be her only calling in life. In fact, she has some more philanthropic leanings. Her pet project is raising funds for a recreation park for

paraplegic children to get therapeutic treatment from riding on dolphins and horses. That may sound a little strange to, well, most people, but if you were to see the honesty in her eyes

whenever the project came up, then you'd understand how sincere she really is.

When the subject of adult entertainment is mentioned, Shane is not really all that interested. "I only watch our stuff, and play our stuff," she explains.

Just as well. There are few games, if any that are better than the two titles that they have out for Interotica/New Machine. Shane also loves playing the new game. (Shane's tip and trick: the long-distance calling card that is included can also be used to get tips for the game.)

As it turns out, they have just begun working on the third installment, a project that sounds like it is going to blow the doors off of everything else. According to Shane, Seymore Butts Interactive III will include a microphone to help dictate Seymore's antics. "The

guys at Intererotica approached us with the idea. They did not have a lot of money at the time, and they weren't sure how it was going to go over. And it was fucking huge." Looks like it going to be another barn-burning next couple of years for

Robert Neason and the boys.

But back to basics. I asked Shane who was the best fuck in the business. Her answer was really funny: "I don't fuck a lot of guys in the business. I prefer to get the young ones, the naive ones—the ones I can get more of a response out of. It's no fun fucking someone

who is totally expecting it."

Fits in with Shane's modus operandi. There was the time in Las Vegas when she blew some 18 year-old kid, while her pal Yvonne was fucking her in the ass with a strap-on. "He was horrified, but he was loving it." These aren't even singled-out incidents, this is what Shane likes to do in her spare time. Whether it be a guy at the coffee shop, or the local volunteer fireman, or bikini babes on the beach—Shane will open up and say "ahh."

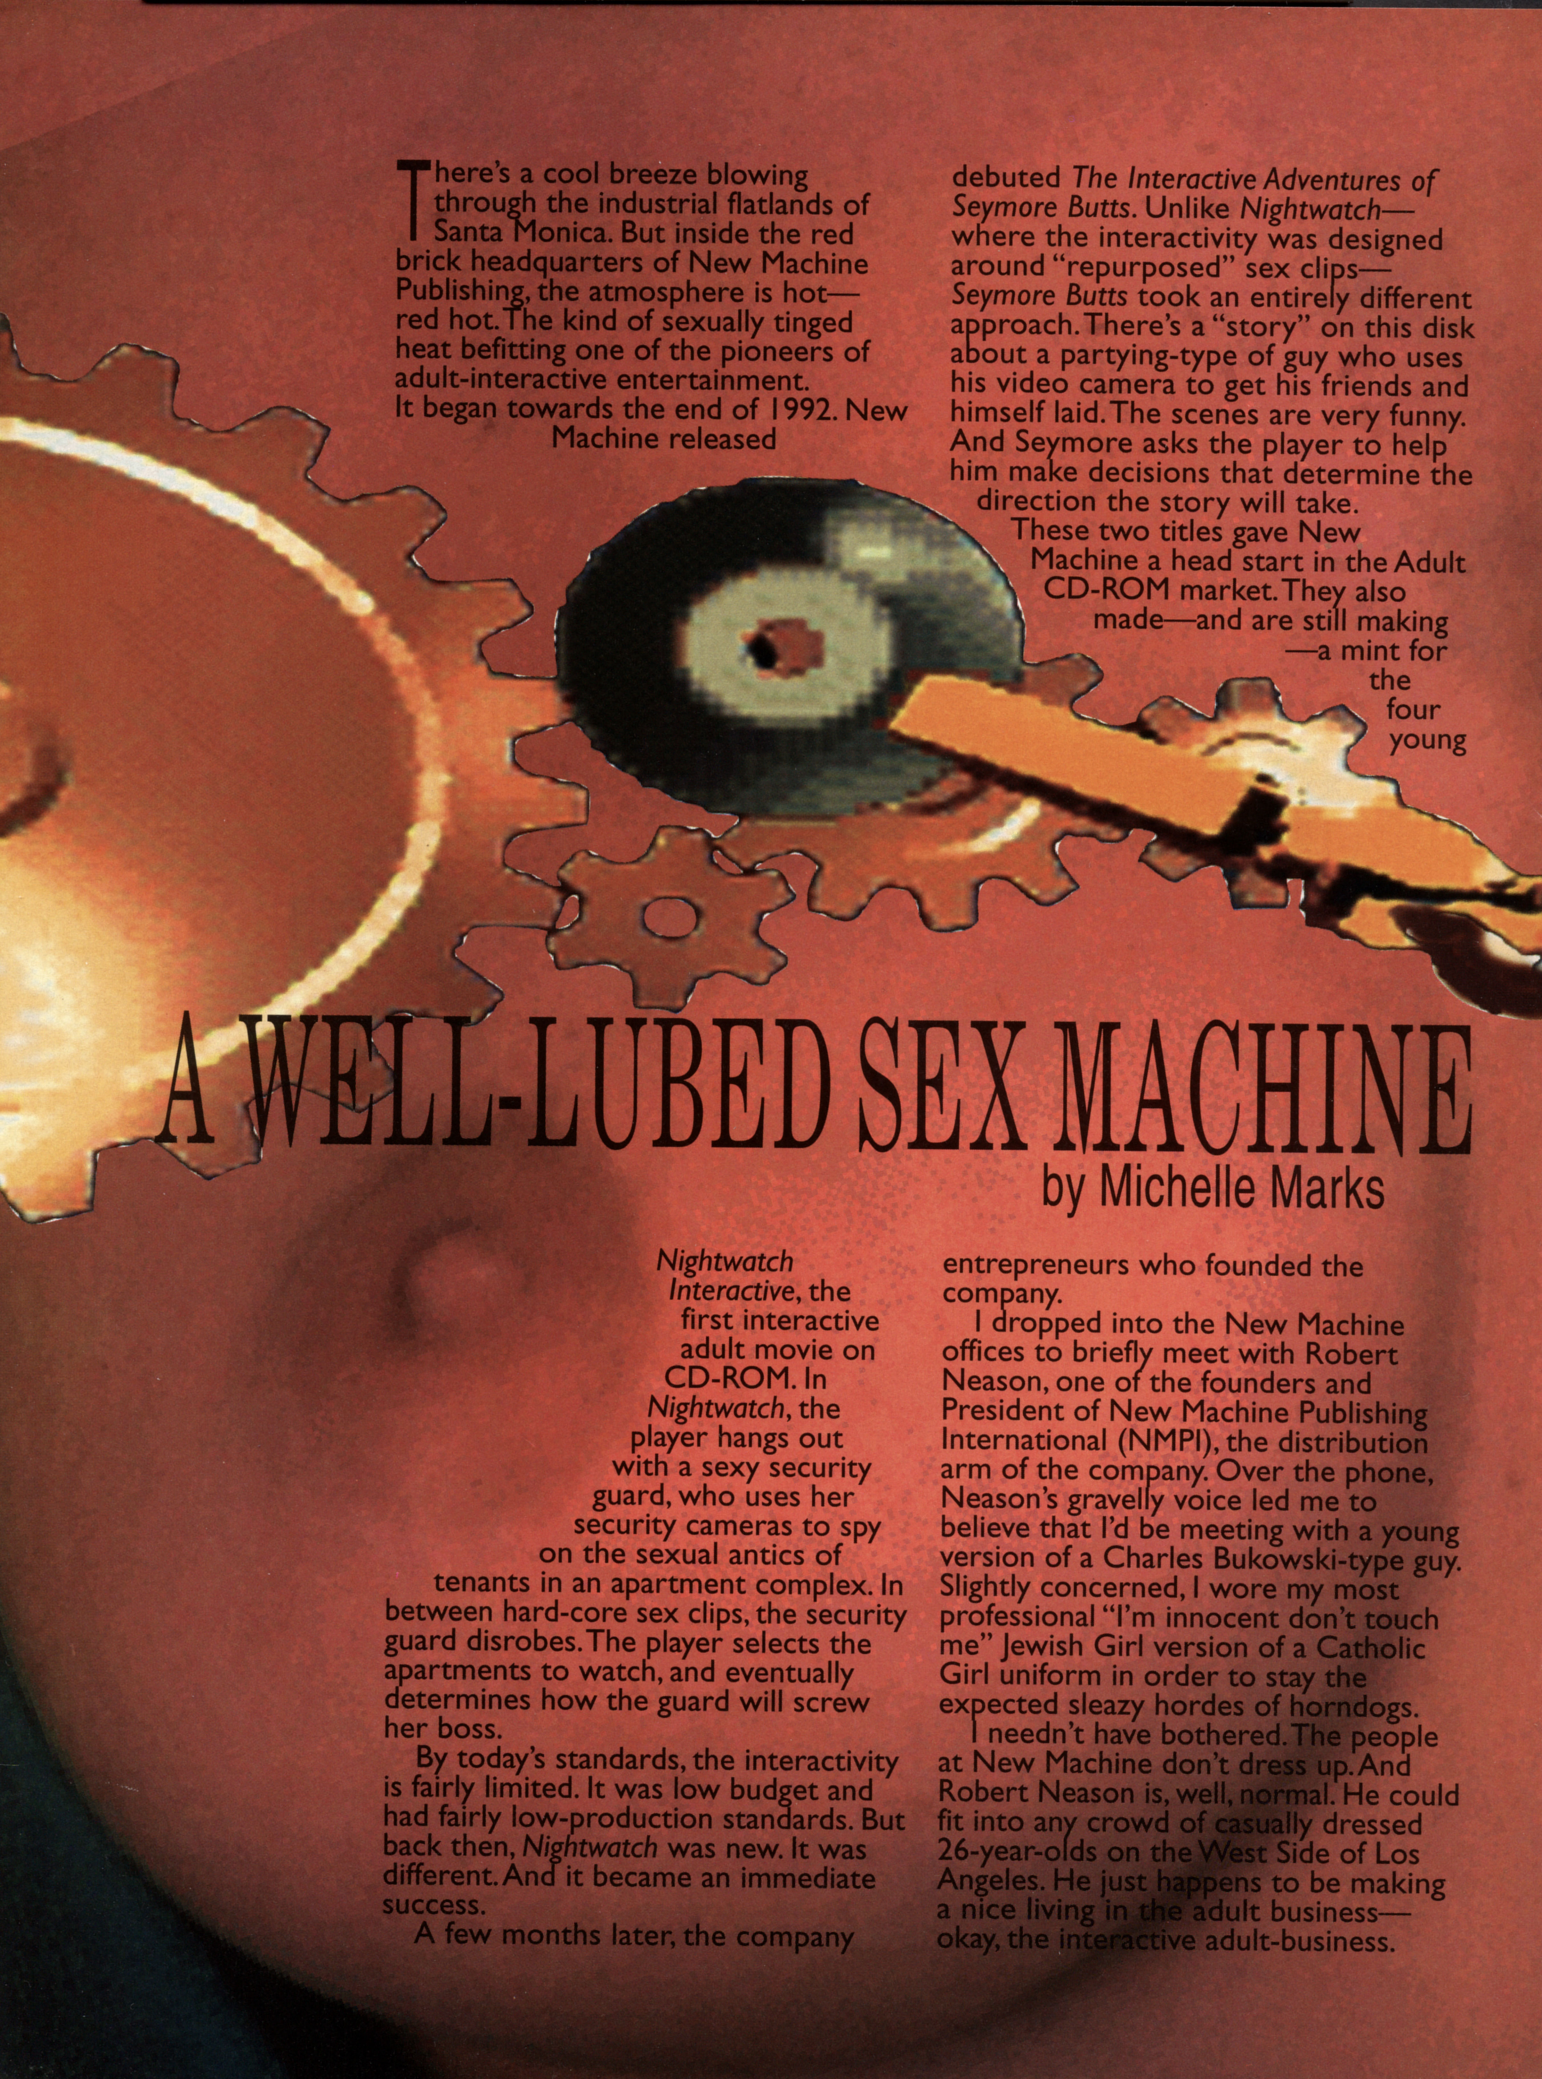

When I flipped a coin and asked her who were her favorite girls, the answers were not surprising. "Yvonne. I mean, I know her so well. We have a bachelor company together. I love Tera Heart. I love Kylie Ireland. And Vanessa Chase is a total sweetie."

As far as male friends go, she likes Al Sanders. She loves Tom Byron. "T.T. Boy is a little cocky son of a bitch, but he's all right. He's one of those short stocky, little guys. I think Seymore is much bigger of a deal than he is."

With Shane at the prime of her career, it will probably be a while before she actually gets to realize her dream with the dolphin park, but until then she

has some short-term plans to buy property in Costa Rica. As far her pregnant dog? Well, a few weeks after the interview, I ran into Seymore. He told me that the dog had six healthy, little bulldogs.

There's a cool breeze blowing through the industrial flatlands of Santa Monica. But inside the red brick headquarters of New Machine Publishing, the atmosphere is hot—red hot. The kind of sexually tinged heat befitting one of the pioneers of adult-interactive entertainment. It began towards the end of 1992. New Machine released

debuted *The Interactive Adventures of Seymore Butts*. Unlike *Nightwatch*—where the interactivity was designed around “repurposed” sex clips—*Seymore Butts* took an entirely different approach. There's a “story” on this disk about a partying-type of guy who uses his video camera to get his friends and himself laid. The scenes are very funny. And Seymore asks the player to help him make decisions that determine the direction the story will take.

These two titles gave New Machine a head start in the Adult CD-ROM market. They also made—and are still making—a mint for the four young

A WELL-LUBED SEX MACHINE

by Michelle Marks

Nightwatch Interactive, the first interactive adult movie on CD-ROM. In *Nightwatch*, the player hangs out with a sexy security guard, who uses her security cameras to spy on the sexual antics of tenants in an apartment complex. In between hard-core sex clips, the security guard disrobes. The player selects the apartments to watch, and eventually determines how the guard will screw her boss.

By today's standards, the interactivity is fairly limited. It was low budget and had fairly low-production standards. But back then, *Nightwatch* was new. It was different. And it became an immediate success.

A few months later, the company

entrepreneurs who founded the company.

I dropped into the New Machine offices to briefly meet with Robert Neason, one of the founders and President of New Machine Publishing International (NMPI), the distribution arm of the company. Over the phone, Neason's gravelly voice led me to believe that I'd be meeting with a young version of a Charles Bukowski-type guy. Slightly concerned, I wore my most professional “I'm innocent don't touch me” Jewish Girl version of a Catholic Girl uniform in order to stay the expected sleazy hordes of horndogs.

I needn't have bothered. The people at New Machine don't dress up. And Robert Neason is, well, normal. He could fit into any crowd of casually dressed 26-year-olds on the West Side of Los Angeles. He just happens to be making a nice living in the adult business—okay, the interactive adult-business.

How nice of a living? "I'm not about to release any of our figures," says Neason, who concedes that between the New Machine and higher-end Interotica labels, the company owns more than 50 CD-ROM titles. "I will tell you that we've shipped over 50,000 units of the *Interactive Adventures of Seymore Butts*. And *Seymore Butts Interactive II: In Pursuit of Pleasure*, which hit the market in May, has already shipped over 20,000 units."

Some quick math: At an average retail price of \$50 per disk, that adds up to \$350,000 that consumers have spent on the *Seymore Butts* titles, alone. Now, throw in the fact that sales of good existing adult-titles are expected to grow steadily along with the increasing installed base of CD-ROM drives, and we're talking about some fairly impressive numbers.

Still, Neason is rather modest about New Machine's success as producer of interactive erotica. "We're a tech company that just happens to use adult material to push the envelope," he explains. "There are so many companies that are simply releasing digitized-linear videos. They are calling *interactivity* a rewind button. I really think there's room at the top for those that stake a claim in the high-end, truly interactive side of the adult business. And we're using the technology as well as anyone in this industry."

Well, they probably are, particularly under the Interotica label. The award-winning *Dream Machine*, which debuted in 1993, is still considered a great example of an exploratory environment combined with an interview-based adaptive engine—and hot sex clips. And *Seymore Butts II* actually requires some thought processes on the part of the player in this funny concept of a laid-back dude's pimp game.

Next up is *Dream Machine 2*. The company promises an improved version of the adaptive engine, where the game is based on how the player answers questions. In addition, it will feature really high-end graphics and more space to travel in. The upcoming *Nightwatch III* is set in a virtual nightclub with hard-core footage. And, if the installed base increases among women, New Machine

will definitely be there with an appropriate product. A safe bet, since we're talking about sequels, is that *Seymore Butts III* is in development with even wilder sexual antics and hijinks in the game play.

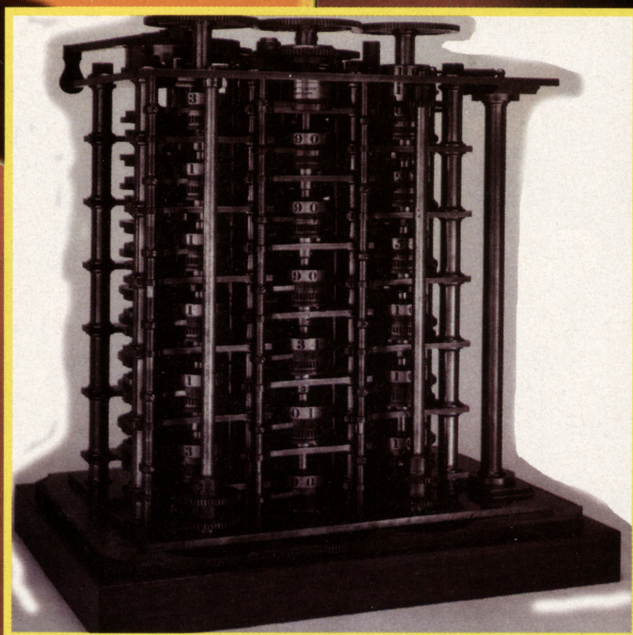

"The gaming aspects are more important than the sex scenes," Neason admits. "But the sex scenes are important."

Is this case of adult burnout? "Personally, I watch so much of the stuff that it doesn't do that much," he says. "Okay, there are certain actresses, like Heather Hunter and Felecia, who will always turn me on."

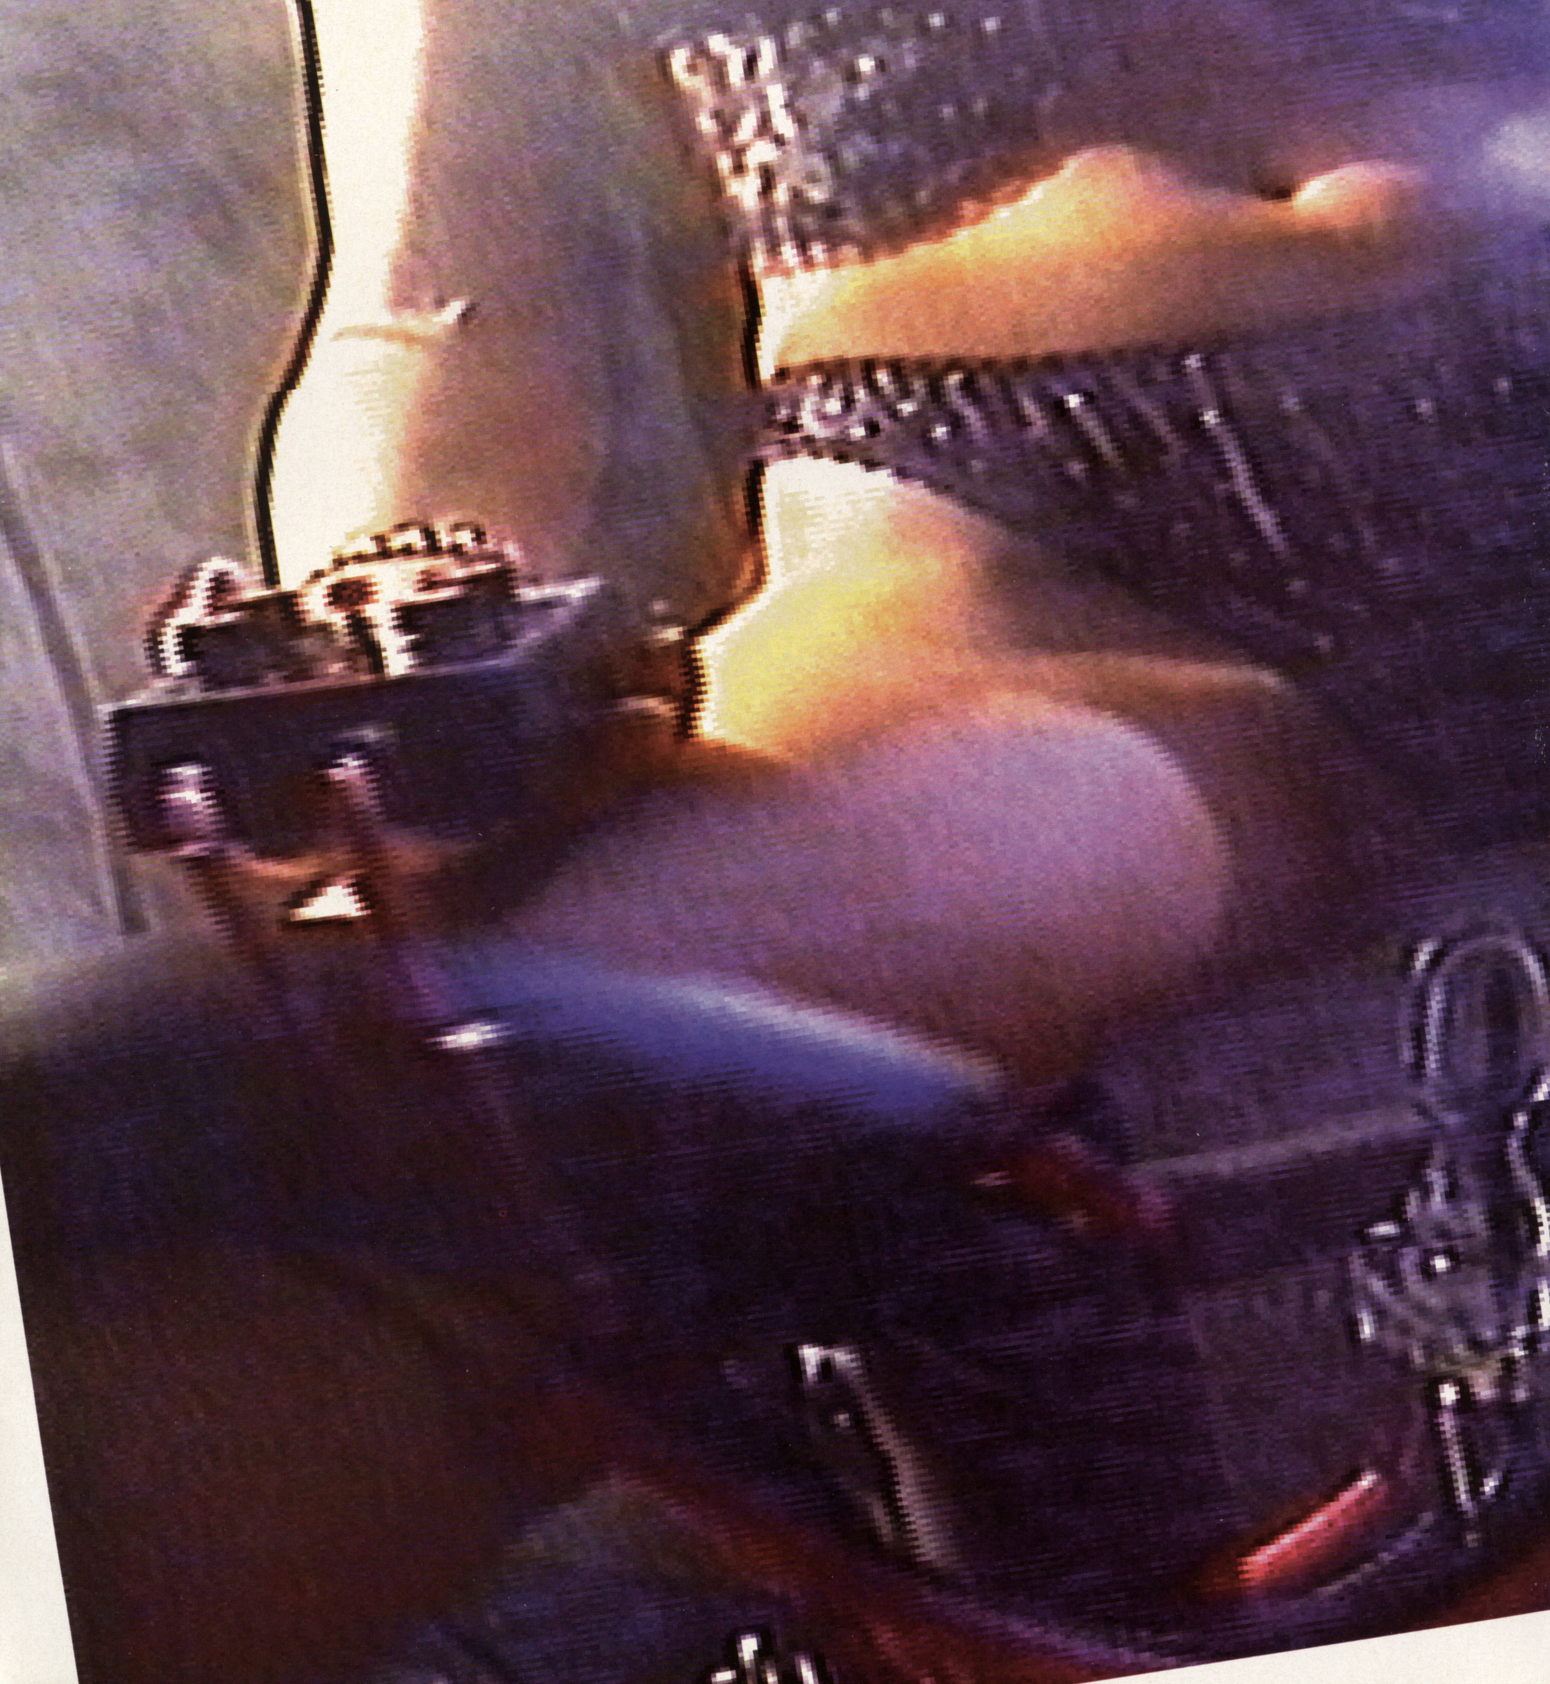

The phones start ringing off the hook. It's obvious that we're going to have to end this interview soon, but I have one more burning question. One that's been on my mind since I began watching adult videos at the tender age of, ahem, 18. "Why do porn stars always wear high heels—no matter what they're doing?"

"Naked women in high heels are the ultimate turn-on," says Neason. "It looks nasty."

And I always thought it was because the floors were too sticky.

THE SHAPE OF S

SEX TO COME

In the Nevada Desert on the edge of the great cultural wasteland we call Las Vegas, a lone inventor is crying like a voice in the wilderness. He is seeking a change in the way we view, practice and experience our lives, our bodies and, mostly, our sexuality. In fact, some of his thinking is so radical, he may not only be pushing the sexual envelope, he has probably created an entirely new line of sexual stationary.

To meet Dant'e Amore at his offices in Las Vegas, you would not think that this guy may just be one of the men who changes the face of history. It is a Sunday afternoon, and he seems like a relaxed, comfortable guy wearing jeans, a T-shirt and Birkenstocks.

His easy smile and conservatively cut salt-and-pepper hair give the feeling he might be either a stockbroker who chucked it all for the good life, or your family doctor. But follow him into his studio and everything changes.

The violet light from the cases along the mirrored walls refracts up through a series of clear and silver shapes out of your wildest fantasies. These hand-made acrylic dildos, butt plugs, cock rings and, well, other things that just do not have an easily recognizable description, are not only beautiful to look at, they are functional too. And it is this function that makes them truly different.

Each of these devices incorporates a series of electrically conductive surfaces. Take, for instance, the vaginal plug. Shaped more or less like a regular dildo, the plug has three different areas on it where very low voltage and milli-amperage electric currents play along its edges. Of course, if you know anything about electricity then you know it likes to travel. And when the vaginal plug is—well, plugged in, the current travels through those very sensitive tissues that line the vagina! Ouch, sounds horrible, I hear you say. You must be remembering the toast you tried to get out of the toaster with a metal fork. What you experienced in trying to play fire chief in the kitchen was a high-energy and high-power moderate frequency uncontrolled invasion of your system by ol' Ready Kilowatt. It shocked your system, you felt pain and pulled away—or you are probably not reading this.

The difference is one word. *CONTROL*

BY JOE FUTERMAN

where we talk so much about freedom is anything but freeing.

Why is that?

DA: Dead Presidents. They just want more dead presidents. Greed. I mean, what is life really about? I feel that when a person gets to certain age—money, materialism, all that shit—you just throw it out the window. My mom told me a long time ago, you can't buy love, you can't buy health, you can't buy happiness. God damnit, that's so true. There are so many people that have blown their brains out that have had all the material stuff. So what is life about? It's really about the old mom's-apple-pie stuff. Being truthful, honest and doing the best that you can do. Our country is going to hell in a basket. In research, politics, everything.

As a researcher, I want to see more honesty. There are so many papers being forged, because the bottom line is if we just change the data a little bit then we can get \$30 million more. Look at the American Cancer Society. Look at what happened with the early investigations of AIDS. Of course, that is just certain people. It does not matter whether we are making ball bearings or curing a major disease. It sucks. We haven't been to the moon in 25 years. We would rather build big casinos than explore. When I start looking on the medical side, then I really go fucking apeshit.

You know the final frontier isn't space, it isn't the oceans. It's ourselves, it is the human mind, it's the brain. To make us better beings, to understand the brain is where it's all at. We could cure many diseases, we could stop crime if we focused on the human brain. We know so little. For instance, do you know what a neurotransmitter is?

A chemical in the brain?

DA: Not just the brain, but all through the nervous system. They carry the messages across the synapses between the nerves. Just last year researchers at the University of Tübingen in Germany, who were using some of my premises on erotic electrostimulation, were able to locate another neurotransmitter.

Really?

DA: Yes, and what is interesting is it is manufactured in the male

genitalia. You know, our little penis down there is a very complicated machine. So there are some very fascinating things happening right now on just the neurotransmitter level of research. Neurotransmitters really point out how we are bio-chemical electrical machinery.

We need to understand how the mind works. There is so much out there, in here. And sexuality is a major part of the mind.

We better start thinking about putting sex on a clinical level. Twenty-five years ago, gays were blowing their brains out because they thought they weren't normal. We are always going to have the right-wingers. We are always going to have the guys that say it is my way or no way—and it is only based on ego and emotion.

My philosophy is based on research and observation of the human species. You suppress your sexuality, and you're going to end up with some major problems in your own personal life, or in your marriage, or in the lives of your sons and daughters—and it goes back to suppressing or being suppressed. Take, for instance, a pedophile. They have very interesting and complex problems. None of the treatments being used with them right now seem to really work. All the studies show huge recidivism rates. So what is the answer? Build more prisons?

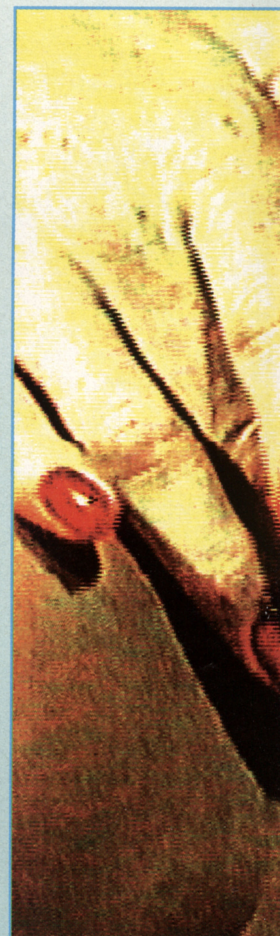

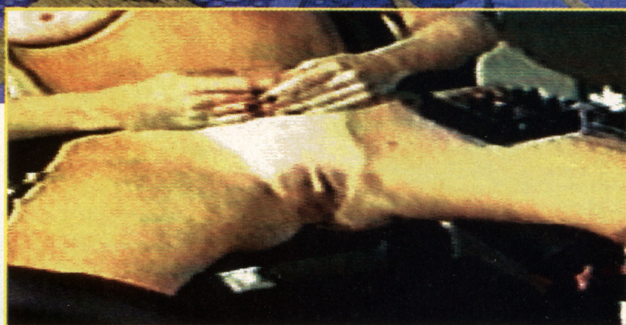

If this application of electromyography to giving pleasure was all that Paradise Electro Systems and Dant'e Amore had to offer, it would be enough for his worldwide clientele. As the following conversation shows, this Renaissance Man is on a much wider mission to free our sexuality, to widen the possibilities of pleasure, and to take the sacred pleasures of the body and mind to a new healthier, more open level. If this is not a mission from God, then it should be.

DANT'E AMORE: Do you like the adult industry?

JOE FUTERMAN: Not really, it is like any industry—it seems to chew people up and spit them out.

DA: Right, right. You know, in anything we do technically, it seems like the social aspects lag about a hundred years behind. The reason I asked if you like the adult industry is that I find it ironic that the adult industry lags even further behind. At one level, I think the adult industry has a responsibility not to lag behind, but to push the envelope. It is almost like an enigma that an area

I'd suggest trying something new like using Virtual Reality. Right now, all the treatments are based upon punishment, rather than reattaching their erotic feelings to a naked man or woman.

So you would create a normal sex-simulator.

scratching the surface, here. Just in the training aspects, VR has a lot to offer. If someone behind you fired a .45, what would happen?

Well, I would jump, I would be frightened, I would have an immediate physiological startle response.

DA: Right. And if we could monitor your

blood at that time—various levels of endorphins would come in to play, various levels of adrenaline would come into play, your skin galvanic response would change—everything would come into play. That is a real scenario. But VR would actually do the same thing. What that means is that we affect the real metabolic rates of the body. So what other types of therapies can we use? It means that rather than popping a Xanax, maybe you wire yourself, and bring yourself into releasing a natural flow of calm-me-down medicines.

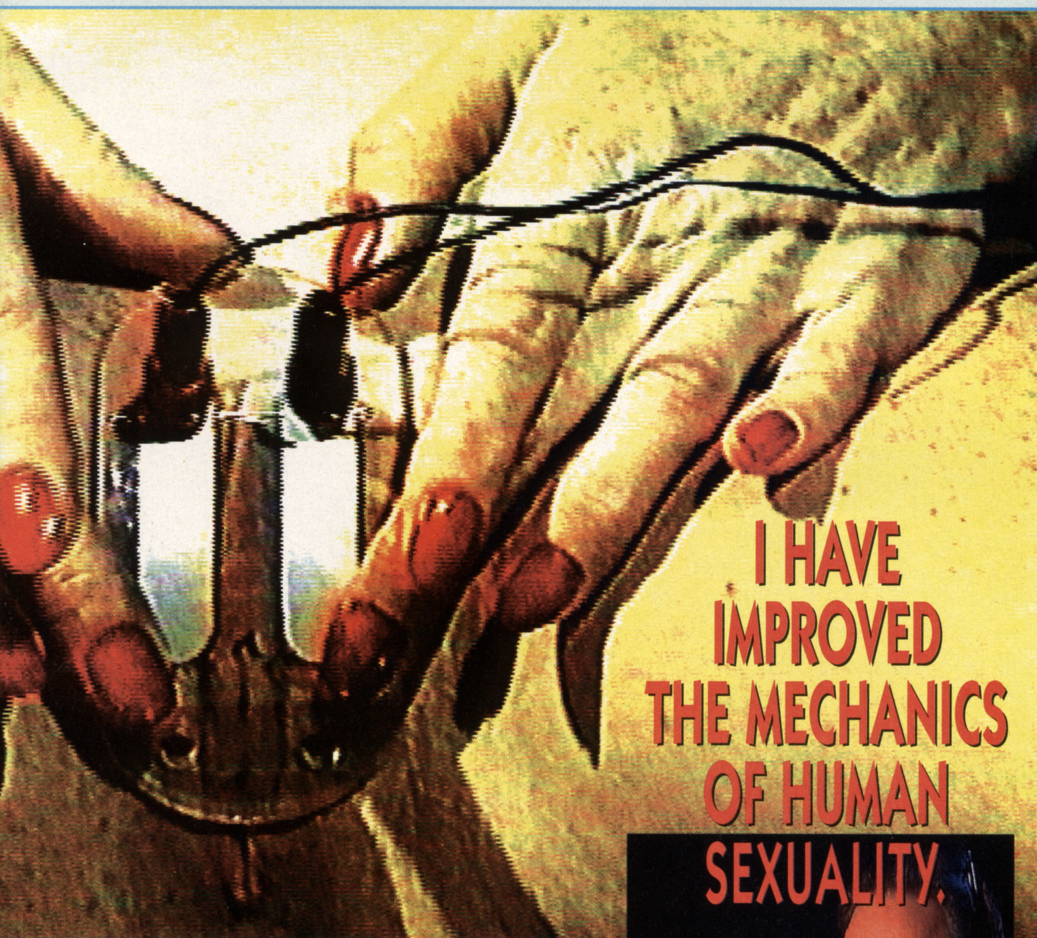

Or, to go back to our earlier talk, at the point that we can map various neurotransmitters, because, of course, the big thing is re-uptake inhibitors. DA: Yeah, Prozac and Paxol, there are about three of them out there. The possibilities are endless.

Speaking of "endless possibilities," how did the idea of connecting electrodes to genitalia occurred to you. Some people get nervous with the idea of putting electrodes anywhere on their bodies. And that is when the electrodes are read-only-devices. These are read-write devices. How would you come up with that?

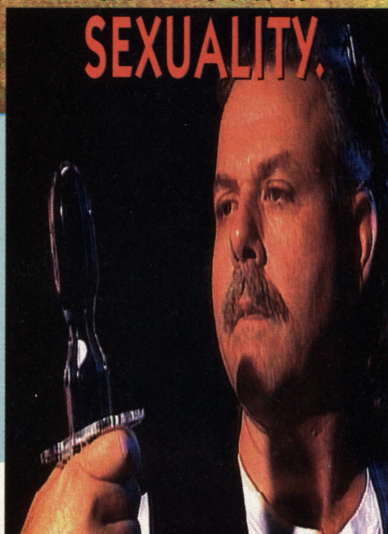

DA: Early on, I studied Cinematography and became interested in Surrealism. Through that I opened my sexual limits to the S&M world. I saw that some people in the community were using electrostimulation. The apparatuses were very crude, like right out of the Spanish Inquisition.

You know, wooden stocks and the whole thing. I always want to improve things, to ask how can we do this better.

That is how the Paradise Electro Stimulations auto-erotic chair came about. They are using wood, and I designed something that is an aluminum-titanium base. It breaks down into a suitcase, and weighs only 47 pounds. You can carry it any place you want.

DA: Right, using erotic electrostimulation we might be able to give these people more appropriate affectional targets. And once VR is perfected, there could be scenarios for creating artificial environments and putting people through them to cure their neuroses. Or to train them to be better human beings in stressful situations. See those are just

THE TEST DRIVE

One Man's Opinion

So I'm staring down at my little buddy and there's this slightly ludicrous looking clear-plastic ring around the base of it. My mind—of its own volition—jumps back to a radio report about human rights violations in Third World countries. One phrase sticks: "...electric shocks applied to their genitals!!!" What the hell am I doing?? My finger reaches for the switch, almost as though it has a mind of its own and... and... NOTHING!! Well, that wasn't so bad. Of course the knobs are all the way down. I was told to turn them up slowly. I begin to twist the knob ever so slowly. I finally feel it around 7.5. It's like fingers that have been sprayed with glue grabbing my cock and squeezing it. I adjust the frequency and the interval. It's as though the fingers begin to squeeze rhythmically. Then the hands put on silk gloves. Well not exactly silk gloves—but how do you describe micro-currents through your most private parts? The truth is it feels different from anything I've felt. Don't get me wrong, it feels good. Very good just different. Did it make me cum buckets and/or did I feel that my time of my orgasm was extended by a factor of four? The answer is not quite. Well electro-stimulation offers something totally different. I may not get the strongest orgasm of my life out of electro-stimulation. But I'm committed to try.

into a suitcase, and weighs only 47 lbs.. You can carry it any place you want. That is the difference.

Like I said, I am a "what if" guy. So, I started looking into the science of electromyography to find out what was there, and I began seeing what the medical side does with it. Boom, I got excited and really started to research the subject. That was back in 1987.

Then in April of 1988, I did my first physical research. I started to realize that what I had here was like plugging a guitar into an amplifier. You amplify the affect of the sex. You know, with an amp, you can adjust the treble and base. You can do the same thing neurologically. With electrodes placed properly and with the correct ejaculatory frequencies, you can achieve a much longer or more intense orgasm. That is what I call improving our sexuality, not cheapening it. Now, that is putting some respect into our sexuality.

Is electrostimulation a fetish device then?

DA: Well, yes and no. After the little write-up we got in Details magazine, all types of people were calling and wanting to try it. They were beating down the doors.

Sexuality is very important, and we have left it to a 4'6" girl called Dr. Ruth. I hate it. I hate it.

Let's get back to basics. I am a surrealist at heart. I like the art. That is where the S&M flavor of things comes from for me. Does it matter, as long as children are not involved, and you have consenting adults? Then rock and roll. On one level, I believe S&M is the ultimate foreplay. People believe that S&M is hang somebody up, get out the cat-o'-nine-tails and let the blood flow. That is bullshit. Why can't we just call it sensory input. There is a very fine line between pain and pleasure. S&M can be light bondage, tickling, a slap on the ass—it is a foreplay scenario.

My god, the church wants us to do vanilla sex, the government wants us to do vanilla sex. Sex was meant to be enjoyed. Fantasies are meant to intertwine with the relationship. They are meant to raise the relationship, to raise the libido. When you can get a male and female—or male and

male, or female and female—together and they get their libidos raised by, "oooh I love to see her in that kind of dress" or seeing him step out of the everyday life and into leathers. When you step out of everyday, and you speak, you feel the words. They feel the sexiness go through their body. And you can enhance that with functional sexual-art or electrostimulation.

It makes sense that the more intellect you have, the more demanding your sexual taste will be. Many of my clients are engineers, attorneys, doctors—they tend to have a high level of intellect. And, of course, with that intellect comes a level of money and time that allows them the freedom to ex are the Ferrari of sex toys, the cutting edge of sexual technology.

That is another pet peeve of mine, the adult industry has cheapened our sexuality with the same old T&A, the same old fuck films, the same old shit.

I say that we are pleasure-seeking-pain-avoiding-carbon-based-problem-solving-machines, and we are driven

by our sexuality. Jesus Christ Almighty, they are insulting one of our greatest drives. We should respect our sexuality, we should have the best for our sexuality. It is the total opposite of what's happening.

What is the primer of how erotic electrostimulation work?

DA: Of course the classic experiment was done with the frog legs. When electricity was applied to the frog legs, the muscles contracted. What you are doing is polarizing the cell, and in doing that we are increasing the sensitivity. That is where I use the analogy of an amplifier. There are certain nerves that can be amplified—the

superior dorsal-nerve of the male penis, rectal tissues in the prostate, pelvic nerve can all be amplified. These are certain areas of the body that can be stimulated to increase the sexual awareness and sensitivity of the genitalia.

Good sex of course starts in the brain. It does not start below the belt. But we can amplify below the belt so it can affect the brain. It is a feedback loop. It is amazing the effect that applying the ejaculatory frequencies (these are a range of frequencies we have found empirically that give a very erotic response) to certain areas. They include engorgement in the male penis and female clitoris.

What happens to most people when they use electrostimulation.

DA: Their orgasm may become more intense. Men can as much as quadruple the time of their ejaculation. And some women, who have never experienced orgasms before, will have them—or even have multiple orgasms. When you take a person who is close to the normal baseline, the experience just becomes much more intense.

So, if it is that much more intense, isn't there a danger of people running to the machine rather than a person? Couldn't this be the death of intimacy?

DA: No, it doesn't seem to happen like that. First of all, if you use the machine with your lover, it becomes a part of sex. It seems to bring people closer together, because they experience stronger orgasms, they become more sexually aware, and become more sexually active with their lovers. You do not use it all the time.

Of course, the possibility for abuse is there. It is there with any power, but that is sickness, that is addiction. These devices are meant to enhance your sex life, not replace it. I am not replacing sexuality, I am intensifying it. My focus is on opening up new areas of sexuality.

I know you are married. Do you and your wife use the erotic electrostimulation?

DA: We have been married for 17 years, and we do not use it everyday. But sometimes, yeah. You know people think Dan'te Amore, and they think of a guy in chains and leathers. I am really a very middle-class low-key person.

I understand that you are working on some other devices and areas.

DA: I'm always trying to push the envelope.

For instance, the Little Big Man, which was named after the first atomic bomb: It is designed for women, and is made of a conductive rubber. The thing that is different about this product is it can be used for clitoral, vaginal or anal stimulation. With the low-profile leads, it can be worn under clothing so you could take your lover out. I have also developed a wireless control for the boxes. Think about it. You could go out, be eating dinner, and stimulating your lover at the same time. Just an occasional twinge. That is some of what I mean when I say that I have improved the mechanics of sex.

On the phone, you mentioned you are working with a video system?

DA: Yes, we have developed a system that would work with our control box, and would pick up a special signal encoded on the video tape. So as the high-impact libido-imagery builds to a climax, the viewer would be receiving electrostimulation that moves them toward climax. Now I am starting a production company to create really high-quality images that would support this experience.

What about VR?

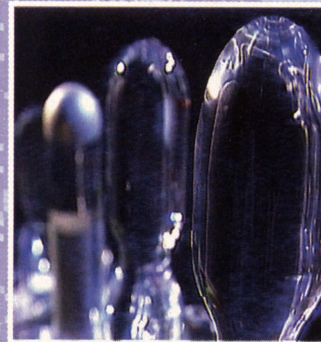

DA: That is in development too. It is a closed-loop system that takes into account a number of metabolic factors like blood pressure and pulse. Then the program varies the electrostimulation and imagery to create the effect. There are a number of areas where this work is requiring new data. For instance, just in setting metabolic baselines. Anyway, we will have this system complete soon. It is ground-breaking stuff.

So, where do you think the future of sex is going?

DA: That is impossible to tell. There are so many possibilities. What I can tell you is if we don't start paying attention to sex—to everything—it will get to be a small world. We have to be careful, sex is a major driving force in all we do. We have to start treating it with respect, or who knows? It is time to dump the greed, to get back to mom's-apple-pie values. The adult industry has a great responsibility. They have got to stop the greed and all this shit, and really start toward a whole new attitude toward sex. It is natural, it is a big part of our lives. We have to start giving it the best or, who knows?

THE TEST DRIVE

One Woman's Opinion

These things are beautiful. They have Art Deco lines. If I didn't know what it was, I'd probably use it as a centerpiece on my dining room table. But looks aside, there's something scary about wiring my vagina to anything. What if I fried something?

What about my future children? But, being the adventuresome person that I am—not to mention that I'd already taken control of the electricity running through my man's cock—I laid back and spread my legs wide.

First, he lubed up the vaginal plug and connected it to the little black box. He reset the knobs to zero, inserted it into my pussy and turned it on. At first I felt nothing. Then it began... like ants climbing around inside of me. Slowly, he changed the thing so it pulsed. It seemed like I was contracting around the vaginal plug in pulses.

I guess the electricity was going through my cervix, or at least deeper into the vaginal wall.

It was, well, electrifying. (And much quieter than your regular old-fashioned vibrator.) I came really quickly... then came again. It was unlike any orgasm I've ever experienced, and much different than coming with a man.

I doubt if we'll throw away our vibrators, but the PES stuff now has a place in the sex toy compartment of our bedside table.

Doug & Dave in the..

Driver's Seat

These days, when the phrase **bad boys of comedy** is used, most people think of OJ Simpson and Hugh Grant. However, I found the legitimate bad boys of comedy—Doug and Dave. “He’s the crippled one, and I’m the good looking one,” Dave spattered as he entered the confines of the **HUSTLER HARD DRIVE** compound. Immediately, my growling stomach reminded me that I may have offered these guys a chance to get a little out of control. Could it have been that I felt speechless in their presence? Was it possible that they were going to destroy the compound in the name of the Unabomber? Or was it simply the fact that I was getting a headache from Dave’s overbearing 24K dookie-chain?

Chauvinistic and bullheaded—most definitely. Coy and objective—you have got it. On that level, they had already completed Phase One of the “Driver’s Seat” test. But could they pass Phase Two of the all-powerful qualifying rounds? Well, in their words: “Comedians and porn stars go hand in hand.” I chuckled at such a ludicrous comment. Boy, were these guys in for a surprise. Suddenly my laughter transformed into high-pitched crying sound when they whipped out their photo album. Slowly but surely they began to spread the insider dirt that made them perfect candidates for the “Driver’s Seat.”

Green Flag

The game we decided on was a little ditty entitled *Cyberstrip Blackjack* from Rapture Interactive. Banking on the fact that Seymore Butts had liked *Poker Party* in our previous issue, I felt I had the upper hand. The object of the game is quite simple. You are on a Pleasure Palace in Space, and you try to outwit the sexy dealers who are from all these different Pleasure Planets. Sounds like a pretty standard set up. As soon as the game began with an elaborate display of space-ship visuals and an interesting hip-hop soundtrack, I knew that it was just a matter of time before these two clowns began covering my Mac with spunk—and referring to me as CyberKen, Lord of Interactive Porn. To my surprise, the bad boys were not jerking off at all. Instead, I felt like they were going to throw a rope around a tree and give me an old-fashioned lynching.

The game started to take a slow pace with your host Mr. Jericho introducing himself to you and explaining the rules of the game. “Where are the hookers, Mr. Jericho? Excuse me, I think you need a copy of the *LA Express*, an open bar, and a better suit,” Dave blurts out at the computer. “This guy Jericho is worse than that Mr. Johnson guy at the beginning of a *Mission to Mars*.” Suddenly, Doug bursts in, “this game sucks. I’m not

being mean to you guys. I’m being mean to the CD-ROM because it blows. I don’t want to look at you. I want to see you get naked. Did I do something wrong here?”

Probably. The music that I thought was so soothing earlier had suddenly turned into the legendary drums of evil. And the game play continued to get worse. Was I going to wake up and find that the worst thing that happened was that my eyes were eaten out by a group of bandit beavers? No. I would never be that lucky. So, I spent the next hour with the boys having my pride sucked out of me.

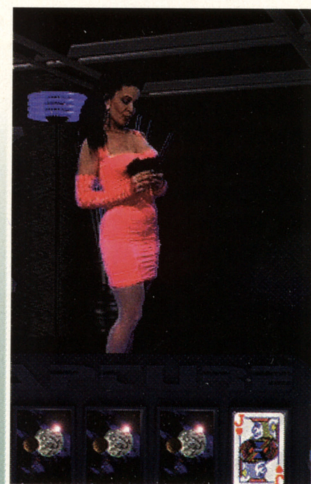

To sum it up, the game was a stunning full-screen presentation—but the play, and the playability were weak. After an hour of farting around with *Cyberstrip Blackjack*, Dave, Doug, and I came up with a comparable alternative.

White Flag

With a handle of Jack Daniels, three forties of malt liquor, a deck of cards, and a hooker, the bad boys and I went on a little interactive journey of our own.

“You see this, Drew,” Dave asks me, “This is what it is like being a comedian. It’s the life. Watch.” Suddenly, like Jim Belushi’s character in *Animal House* (who Dave actually had a job impersonating at an undisclosed theme park in Orlando, Florida), Dave threw down a third of the bottle and belched loudly. Gee, I had not remembered the

Space Station smelling quite that bad. But the cheap hooker we had in the room was amused. Not as amused as we were to find that after she left, all of our wallets were missing. After an hour of liquor consumption, we had reached the ultimate Blackjack Space Station.

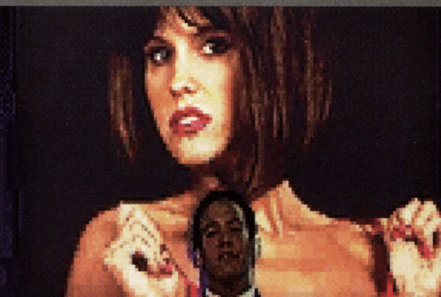

Sure, we didn't interact with artificial intelligence like in Rapture's game, but the hooker's tits in my face served the purpose. And we were not actually flying in space like we could have been if we had stayed behind the Mac at the compound. But falling down the stairs at The Club Stigmata was pretty damn close. The only difference is that we did not get to meet that zany Mr. Jericho, who promised us all the pleasures of the galaxy. However, we did beat up some guy in a bad suit who tried to sell us some crack—and we felt we had done our deed for the day.

Checkered Flag

Cyberstrip Blackjack—It's got fucking elevator music that plays over and over, and all I want to do is see the bitch naked. I'd rather fuck a Nintendo. This thing should come with something that's free, like maybe a buffet. There is nothing erotic or sexy about this game. It is about as arousing as a game of golf on television.

Doug & Dave's Version—It is an interesting insight into the world of the comedy mind, and the compulsive alcoholic. Can be seen anywhere in Las Vegas, or in the confines of your own home. No computer needed. Price—a little more expensive than the CD-ROM, but well worth it.

A Gambler Talks Back!

I am going to have to say that I do not agree with the antics of Doug and Dave. Personally I find both of Rapture's casino games—*CyberStrip Blackjack* and *CyberStrip Poker*—enticing, fun, and very well made. For example, the full-screen poker play is fabulous. The dealers are hot, and the play is pretty smooth. The good thing about card-game porn is that, well, card games have stood the test of time and so will interactive CD-ROM versions. Still, some of

these interactive games lack a high degree of difficulty. But this doesn't bother me. In fact, I find that easy play/easy win makes getting your final reward just as satisfying as cheating on your SATs and then failing out of Harvard in your first quarter. This is a fine game, and the combination of host, dealers, and environment really creates a virtual world that can be explored—ad naseum—on your computer.

HOW
WE
RATE

Review Index

The rating system is based upon a simple 0% to 100% score. Zero could be said to be well zero, nothing, nada, zilch, there was nothing here, we couldn't get the disk to run on any machine, or undocumented features caused our hard drives to crash and burn. Of course a 100% ran beautifully, had us coming on our keyboards. We worship, (by the sacrifice of small animals and/or virgins when we can

get them) the creators of these disks—and expect large profit participation in these developers' next projects. Needless to say, most things fall between these two extremes.

The **Overall Rating** is itself an average of three factors: **Sexual Appetite**, **Interactivity**, and **Fun**. Each of these factors is on a 0% to 100% scale, and for a sense of what that means, see below.

SEXUAL APPETITE

Sexual Appetite is a measurement of just how much this product had our reviewer—well, let's just say hungry for love. Clarification: **0%-30%** is an afternoon with soft-core adult magazines; **31%-60%** involves adult beverages, foreplay in the car, and an invite in for a nightcap; **61%-85%** means heavy petting and we hope you wore clean underwear; **85%-99%** is hot, the main event, practice safe sex, protect your peripherals with latex; and at a **100%** rating, minds open up, souls leave bodies, and players become One with the Universe.

INTERACTIVITY

Here is the *buzzword* of the '90s. But if you ask around, you'll find everybody has their own definition, depending upon what they're trying to get you to buy. At **HUSTLER HARD DRIVE**, we rate the experience based upon a simple notion. If every image in here were Doris Day—fully clothed and telling bible stories—would we keep playing??

So, **0%-30%** is about ten point-clicks to boredom; **31%-60%** covers standard games and the usual interfaces that don't thrill us, but don't get in the way; **61%-85%** means the interactivity here is cool, it is something we have not seen before, or a masterful implementation of something we have seen before; at **85%-99%**, you are entering into virtual worldom, gaining a sense of a new or different reality without any mind-altering substances; and a **100%** rating incorporates full-motion, live-action, real-time rendering—it is *Lawnmower Man* with liquid-metal sex.

FUN FACTOR

Again, this classification is pretty relative. So, we stole some concepts from serious artists: I don't know what's fun, but I do know what I like and this is it. At **0%-30%**, we are thinking rectal exam here, kids; **31%-60%** is a great night out with the woman/man of your dreams, but you went home alone; **61%-85%** means you are living your life in a beer commercial; with an **85%-99%** rating, you won the lottery; **100%**—see **Sexual Appetite**.

CATEGORIES

The disks fall into the following types:

INTERACTIVE ADVENTURE GAMES involve game elements like the climax of winning—but it's placed inside an Exploratory Environment. Think of *Doom* with T&A, get it?

EXPLORATORY ENVIRONMENTS a rendered world to wander around in there just isn't anything to win. Your motivation has to explore, so take your time, work up to it slowly. Why? Because it's there.

GAMES are, well, games. You know, like Parcheesi or Monopoly or a Strip Poker.

THEMED CLIP VIEWER/INTERFACE are pieces are about looking at clips. These titles have various features and may include stills. In essence, these disks work like a digital VCR with out a remote.

INTERACTIVE TRAINING titles provide opportunities to improve skills and add some new tricks to your repertoire. School was never like this.

LINEAR DIGITIZED disks are video tapes on the coolest, newest format. Whoopee!

PHOTO CD are stills on a CD-ROM. Some have images that are good for uploads, or just for viewing. Remember, you can't say you buy these disks just for the articles—there aren't any.

SYSTEM REQUIREMENTS

These are the minimums. Of course, anything that is faster bigger, stronger and longer will be considered a plus.

MAC: At least a Mac II with a double-speed disk drive, 256 colors and 4MB RAM.

PC Compatible: 386 with 4MB RAM, Windows 3.1, or better, a soundcard and double-speed CD-ROM.

Okay, so da centerfold dame has gone an gotten herself drowned in da pool up dere in Michelle's house on da hill, an Michelle called you ta help her out o dis jam. Got it? O course no one in dis very classy disk talks like dis at all. So what da flock am I doin dis stupid accent for!?

In fact, Nick Steele PI is one of the most sophisticated attempts at real interactive storytelling that this reviewer has seen in the adult market. Or for that matter, any market. It is the story of a hard-boiled L.A. detective that is told in first person POV, as you, the viewer, get to be Nick.

Interview the suspects, check out their pasts, search their rooms for evidence. You can choose to do any of the above actions—and you better do most of them or you will never crack this case. I, of course, guessed the skipping butler right off. But then I found out he was not even a suspect. Damn.

Not only is this later day *Lady in the Lake* well plotted, it is also filmed and acted nicely. When was the last time you saw those words about an adult product. Okay, so there is no penetration and no cum-shots. Yes, **Nick Steele PI** is rated R.

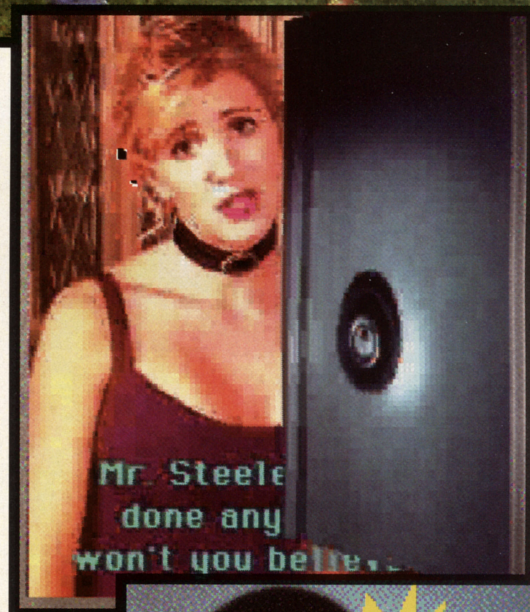

But it is great to have a penetrating story, just for a

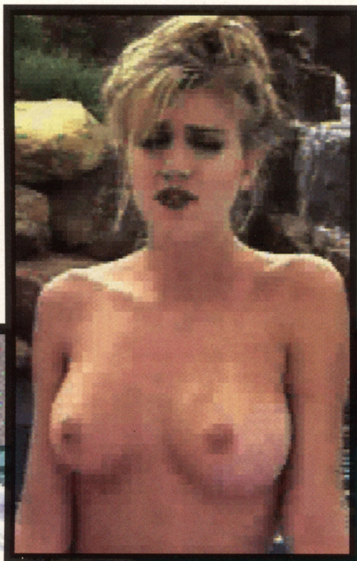

I'D LIKE TO SEARCH THESE FOR EVIDENCE.

change. Not to mention the fact that there is some pretty hot girl/girl action.

With **Nick Steele PI**, Intermaginary Entertainment has given us an excellent idea of how interactive movies might actually work. Add to that an adult product without the trappings of sci-fi nonsense (so many producers in the interactive market

DIGITALLY IMPLEMENTED VIRTUAL ACTRESS

Virtual Sex

After my slight disappointment in VCA's *Nasty Parts*—the game is just too difficult—I was a little hesitant to give them another chance. Maybe it is because I am stubborn, or maybe it is because I am just stupid.

However, when I played *Virtual Sex*, my finger-pointing and name-calling quickly came to a halt. *Virtual Sex*, VCA's latest fully interactive game is fabulous, and now I feel like the town fool for accusing them of being a sloppy company. With more features, better graphics and running-time, and more playing challenges than anything else currently on the market, VCA is looking at a sure-fire winner to clean up the foul smell that *Nasty Parts* left behind. It takes a man to admit when he was wrong. And even though I may not act like a man, or even a preteen-ager, I was wrong.

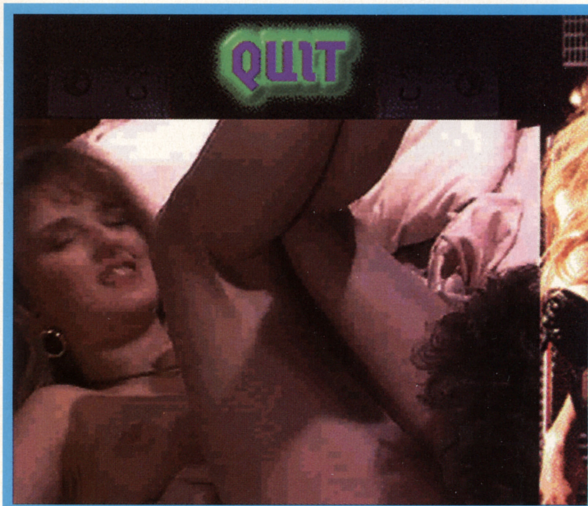

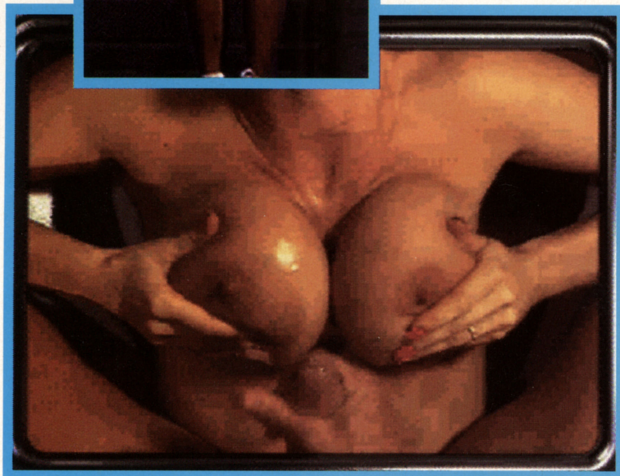

The game begins by explaining to you that you may choose between three different girls, who, by the way, are all totally smokin'. One is a Cheerleader, one is a Nurse, and one is Stewardess—sounds like Jack Tripper's favorite dating-list,

to work them hard, if you want to see the fuck-scene. After the mood is established, you have to choose, in order, the moves you would put on her. These range from rubbing her back

except VCA decided to leave the ever-present twin factor out of the game for reasons only they can explain. After you click on your choice, she tells you one of the three moods that she can be in—Good, Tired, or just plain Pissed Off. Special tip: If they are in either a bad or tired mood, you really have

to digging her corn. Like many games of the genre, there is a Pleasure Meter below the actual action screen, that either rises or falls, judging from how well you choose. I know this

I'd cough for her any day.

such awesome games, because from now on, they can only get better—if you have seen the promo for *Latex*, you know what I am talking about. There is no way you can go wrong here, because the game is just

Is that the new Maxie Pad with wings?

has been said a thousand times before, but you have to play it smart, or else you are not going to get anywhere. These girls might be porn stars, but when it comes to really trying to fuck them, it is not very easy. If you get through all three girls, you get to go to the special Kelly O'Dell corner, where you can

VCA really outdid themselves with this game, and it is a must-have for any adult-gaming collection. The look of it is very advanced, and it features full-screen gaming. Everyone at HUSTLER HARD DRIVE hopes that VCA continues to develop

difficult enough to keep your attention, and there are endless possibilities—besides no one has ever accused VCA of being a tame company.

Hot Dog Girls of Florida

When I saw the title of this game, I was extremely interested in what the hell it was going to entail. Then, I saw it. And it is Goddamn fucking hilarious. Although not one of the most advanced titles in the adult-game medium, it has an angle that will amuse a lot of people. Not only that, but the product quality is pretty darn good. Since I did spend five years of my life in Florida, I look back now and wish maybe I had spent a little more time at the local hot-dog stand, rather than in the school cafeteria. Don't get me wrong, there were plenty of hot girls at my school. However, I never once saw them spray their naked bodies with mustard and ketchup, except when one of the clumsier, uglier girls, accidentally lost the balance of her food tray and doused one of the hot girls with food slop—and then they were clothed. Shucks! Yes, my friends and I used to get a good, cheap laugh, but it was about as sexually stimulating as watching a dog drink out of a clogged toilet.

The game begins with a graphically rendered map of Florida, with around six or seven different girls located in different regions. By clicking on a Girl, you can find yourself either taking part in a role playing, choosing your own adventure game, seeing a bunch of pictures of your Girl naked, or seeing your ultimate-dream sequence with her. The dream sequences usually have them doing a striptease, with the buns, dogs and condiments being some sort of icon. Sounds fun, considering that all the girls are standing around hot-dog carts with a blue-screen image

of somewhere in Florida in the background. I do like the hot-dog metaphor, but I

How d'ya like these buns?

think that if Romsoft had gotten some girls with a little more spunk, we could have actually seen the hot dogs really doing their thing. From what I saw, these were not beanie-weenie sized dogs. We are talking Ballpark Franks, baby. My point being, they should have utilized the full potential of the metaphor, making things a little more hard-core.

But the idea is there, and I do fully recommend this disk. You should be warned, if you are going to buy this product for any reason other than

Pass the mustard, please!

having it as a novelty item or a device for sexual arousal, don't bother. I am sure there are plenty of other regular games that can fulfill those needs. I did like it, and I hope that Romsoft has future plans to develop more titles like it to entice those food fetishists out there. Maybe if this one does do big business, then we will be looking at a sequel entitled Kielbasa Girls of Poland, or even Beer-in-a-Brat Girls From Minnesota. Who knows, but Romsoft should definitely be congratulated on providing the adult CD-ROM world with such an originally absurd idea.

Girlfriend Tracy

Sometime in the 1940s, a brilliant mathematician who would soon be thought of as one of the fathers of computer science, came up with a definition of *AI*, or *Artificial Intelligence*. It went something like this: If you can develop a program that could respond to a conversation and people cannot tell that they're talking to a computer, then that program could be said to be intelligent.

What has this little story have to do with adult software? Well, as far as the folks at AIVR are concerned, plenty. That's just what they've tried to do with their **Girlfriend** series. The **Girlfriend** engine at its base is a pretty sophisticated language parser. Of course, for the adult market, AIVR has added a vocabulary that you're not likely to find on any AIs at MIT. (How many of them are familiar with terms like pussy, cock and fuck?)

The way it's played is simple. Your **Girlfriend** opens the door and lets you in. She asks you what you want to talk about or do. From there, how far you go depends on your conversational prowess and the particular girl. In fact, different **Girlfriends** have different ratings, ranging from a G to a nonpenetration X.

Playing this game is a cross between the old Infocom text-based games like *Zork* and the old Rogerian analysis program *Eliza*. Your first challenge is learning to talk/type so that you'll be understood. *Understood*??? I can just hear you say that this is a program on a computer, and nothing more. It can't understand you, and, of course, you're right. But that doesn't change the fact that you have a sense of being understood or misunderstood by this program. The easiest way of being understood is to keep your conversation simple. Like in Neanderthal simple—if this is your ilk—phrases like *I fuck you* work well. Of course, if you're going to do it that way you may become bored

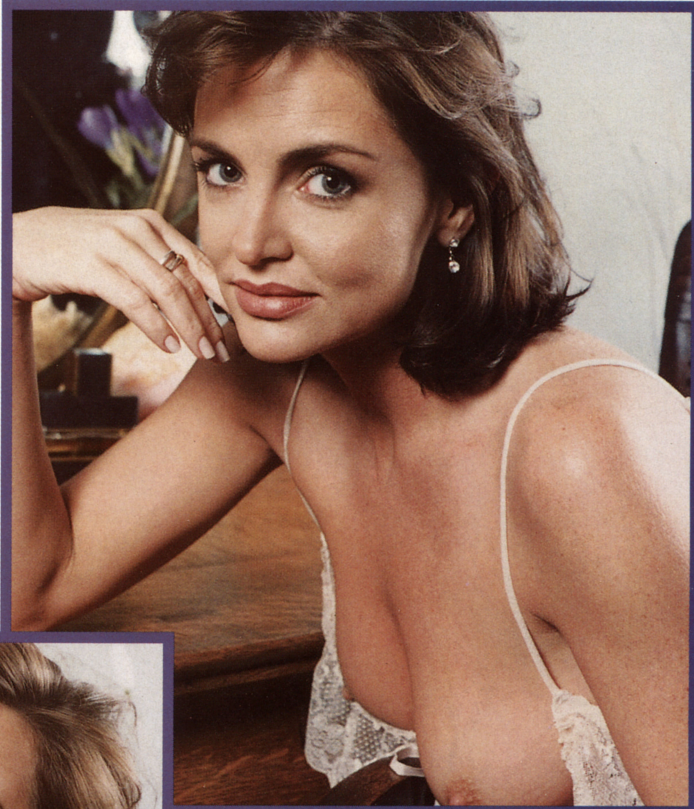

rather quickly. Myself, I was a little disappointed by the very normal set of sexual algorithms that went something like this:

I've got great learning curves!

- 100 Remove clothes.
- 200 Print "This would be more fun lying down (giggle)"
- 300 Fuck
- 400 Mood level = Orgasm go to 700
- 500 Print encouraging message
- 600 go to 300
- 700 Print post-coital message.

Well, it's not that simple. But I wanted to suck her pussy through her dress, and she just kept telling me her dress was in the way. I knew that. That was the point. Although AIVR's new **Girlfriend Tracy** incorporates full-motion video, I was a little disappointed that she could "GIGGLE" but if I typed "GIGGLE" she asked me for a definition. Have you ever tried to come up with a one word definition for *smiles* or *satisfied*? It's not easy. In some ways though, this is the fun of the game. And if you come up with a good definition she'll learn it and apply it later in conversation.

Girlfriend probably isn't for everyone. If you're looking for hot sex clips, you won't find them here. Nor will you find

stupid game elements overlaid on anal or oral penetration.

But if you want to see the first women on your computer to incorporate AI—and you want to teach them what you want and enjoy dirty typing—then this is your package. Finally, let me say that while working for this magazine, I have talked to

several porn stars. And in that light, my experience with **Girlfriend** was refreshing. After all, the **Girlfriend** may start dumb, but at least she can learn.

Videophone

Are you the kind of person who can get his rocks off on the phone? You are? You're weird.

Whenever I try to imagine dialing up one of those Dial 1 (900) 555-FUCK lines, the only thing that gets me hot 'n' sweaty is the thought of the phone-bill sitting like a hand-grenade in my mailbox. And I can't help thinking that the owner of whatever hot-pants voice you listen to probably looks like Pat from *Saturday Night Live*. But now, with the advent of the still-primitive videophone, the phone-sex industry is poised to acquire a whole new dimension. No more alibis, Pat! Stop pretending to be naked and get 'em off! Now! Of course, in this Brave New World one essential element in sexual fantasy will be obsolete: imagination.

And (you'll love this segue...) an absence of imagination is the perfect place to start when discussing **Videophone: Love Line**

Number 1, a new, pricktensing whack-off title.

Here's the set up: Your screen is a virtual videophone. You dial in the phone number and—a-ha!—up comes Shayla LaVaux, your pneumatic hostess. She'll explain the rules to you—in English, French or German—but the short version is as

follows. You make videophone contact with three available vid-sluts. Answer their

questions correctly and they'll agitate and abrade their nethermost parts with Finger or Dildo or whatever. And once they've degraded themselves sufficiently they'll give

you a code number that you should note down. The dildo-dippin' dames include Evangelina, whose

copper skin represents the ROM's only deviation from a bland, blond norm; Lolita, played by Dragixha, who is kittenish and very ooh-la la; Julia Channel as Claudia, whose tricky, moody ways can wrong-foot you plenty. One wrong

answer and she'll stop bumping pussies with her Asian maid (Melle Lee) and cut you off. That sends you spiralling back to the Main Screen, where you find that Shayla is toying wantonly with her tits.

And so on.

The purpose of all this nonsense is twofold: To drive you into

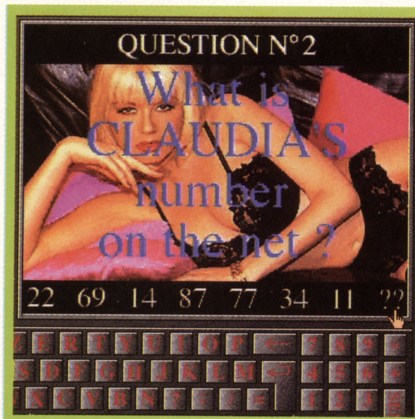

Let her fingers do the walking.

paroxysms of frustration if you're too stupid to figure out the mood of whichever bim you're "talking" to (and you'd be pretty obtuse not to pick up on the mile-wide hints and clues); or to pull on your pud till nothing remains of it but a bloody stump. There are other erotic things in life, like laundering your socks or vacuuming cat-hair off your couch.

Designer Bodies

With good packaging, and a promising set of features, **Designer Bodies** looked like it could be the first release to put Vivid up as a real "high-end interactive" game company. But perhaps they have been putting too much time and effort into their new PG-rated company, Atlantis—and its first release

Mirage—to realize where their priorities should be. Has Vivid suddenly become disloyal to the products that made them one of the largest players in the adult industry? Give me a break, guys, because if I had paid for **Designer Bodies**, I quite possibly would have taken it back to the store wondering why it didn't work.

As far as the big picture of **Designer Bodies** goes, I will simply explain why this game doesn't work for me. It doesn't do anything. The biggest kick in the game were the sex clips of Asia Carrera. Great, what else is there. Well, a bunch of lame stills that are supposed to be these fantastic graphic images. Don't flatter yourself—it's simply a series of canned Photo Shop techniques. I have seen rave invites from five years ago with cooler shit. For some reason I was under the assumption that this was a game of challenge to see if I could pick out separate outfits and backgrounds until the girl I was dressing was happy. Therefore, I could have

earned a peek at a sex clip and, ultimately, found satisfaction. Instead, I got three girls whose clothes change for me when I click on one of 16 squares or beads.

Hey. Maybe I'll fuck in front of the camera for you.

The sad thing about **Designer Bodies** is that if they were making a photo CD, it would have been nice if the girls

actually changed positions. Realistically, this is not much better than the technology involved in dressing a paper doll. Maybe this would have been above par if it was simply a screen saver—but it is being publicized as a game. Sure, it

may seem gooeey and fun at first, but as soon as you realize what it is, you just want to get rid of it and make sure nobody saw you

make an ass out of yourself. Lastly, and this is more of a personal preference, nobody is really impressed by morphing anymore, it is just going to make this thing look even more dated than it already is. Hopefully this disk is not the future of the Vivid Interactive product line, because this company has so much material to work with.

DEALER INQUIRIES WELCOME. Phone: 310-552-4854

Virtual Vixens

All right, you net jockeys and space jammers. Your best buddy is being held in stasis by a piece of "assware" (highly interactive, artificially intelligent, sexual-pleasure program), that has gone nuts at a pleasure palace called the **Virtual Vixens**. The only way she (the assware) is going to set him free, is if you can please her, and her girls. That means making sure that each of these sexy, virtual women reach orgasm before you do, four times in a row. Well, that is the set up. Do you think you are man enough to handle it?

In **Virtual Vixens**, PIXIS provides one of the best balances of gaming and sex that has been developed to date. It is a system that is used with more refinement and polish in **Space Sirens** and **Space Sirens II**. As you can tell from the backstory, the game elements are very present in the whole experience. **Virtual Vixens**, and its descendants, are among a handful of first-person Point of View (POV) sexual experiences on the market. Which explains this truly excellent disk's strengths and weaknesses.

After all, isn't VR sex (the kind the manager in *Brainstorm* had when he spliced that tape) what we are really looking for in all of these disks? **Virtual Vixens** comes close to this, using predetermined, first-person animated walk-through and first-person sex sequences.

That's right, *first person!* How does that work? I hear you ask. Well, the girl appears in front of you on the standard QuickTime™ screen-size. She is on a screen in a console, that holds the rest of your interface tools. You know, like the Hand tool and the Penis tool. First you choose a tool. Then you indicate an area (Face, Tits or Pussy—

oh you can also turn her around for the doggy-style approach) on the mannequin at the right side of your screen. You can use the Open Hand to caress, Closed Hand to remove clothes, and the Penis tool to fuck or get sucked. (There is no tongue tool, which I thought was a pity. But, hey, that's just what I like.) Once you have chosen the tool and the area, a POV video-clip begins. At this point, supposedly your hand or

Open your hand, close your hand—now squeeze.

cock does what it does best. (I've got to say, that maybe the cock is almost large enough. But that isn't my gut jiggling at the bottom of the frame like a washed up jellyfish.)

Vixens suffers from the major weakness of a not-fully interactive POV experience. Given the opportunity to tickle, suckle, pinch, caress, nibble, finger, slap, suck, or just plain fuck

some of this first-class woman flesh, nobody is going to make the same choices. For instance, Eve (one of the VR Girls) made me want to lay my head between her thighs to lick her pussy into the submission, while I listened to her Schwarzenegger-accented moans and screams. I bet I could have her coming in just one clip, given that option. But, alas, it is just not there. Still, PIXIS is clearly working head and shoulders above their competition in terms of first-person sexual experiences.

Finally I felt that the game elements don't pay off enough. I went into that "sexual matrix." I won, I earned it. So come on guys give it to me. I'm waiting.

Electric Swing

Ever dream of picking up one of those tabloid-swing mags, with all the picture ads, and making a call directly to those dripping-hot women or couples who have placed their announcements? Well, that's what **Electric Swing** is all about. This Ultimate Interactive product, with an interface based upon a magazine, is really a clip viewer. It does have one extra feature—frustration. I know (I think we all know) that finding a date can be a frustrating and even ego-challenging experience. But that's the way it is in the real world. It's not what I'm looking for in my entertainment.

What I'm grouching about are the game elements of this product. It works like this: You choose an ad from the Table of Contents Page. The computer turns to a Page with a couple of more stills that will give you a better feeling for this clip. If you want to see it you hit the Call Button. On your view-phone-like interface, the woman, or couple, will pick up, talk at you for a few minutes, and here's where it gets weird. A Test Screen of sexual trivia pops up. I mean, who cares what some shrink said in

Penthouse? (I'll let you in on a secret: I don't buy it to read the articles.) So you have to

answer three questions. If you miss one, that's it. The on-screen characters will treat you to some pretty harsh rejection, and hang up on you. Sound like a good time? If you happen to guess right, or you

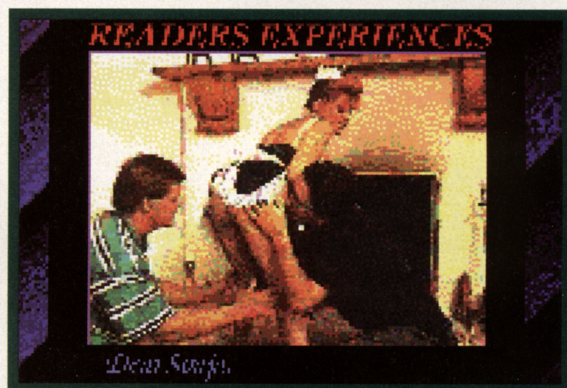

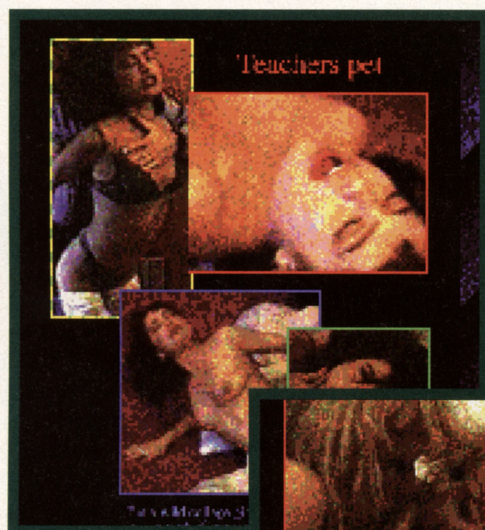

know the Latin name for certain sexual dysfunctions, then you get treated to a clip. The clips, unlike the interactive design, are hot with both star power and

So then she stuck this thing right in my face!

Girl/Girl/Guy Menage or the Girl/Girl Show both can stiffen your resolve to try and answer those stupid questions.

Given the hot sex on this disk, it's a pity that the producers just don't seem to get the fact that interactivity should not take you out of the on-screen situation, but pull you deeper in. Maybe before they go on, they should read Laurel's book *Computers as Theater*. I mean, if I wanted to have sex with Dr. Ruth I'd give her a call. Good idea in the swing mag, but for **Electric Swing**, let's stay with the conversations.

Crystal Fantasy

Every time MacDaddy launches a new project, I am always interested in two key factors:

Have they updated their technology to compete with the big name interactive guns? And have they kept their photo quality up to their usual prime whacka-bility. After putting **Crystal Fantasy** in my drive, I realized that producer/

photographer Ivan Nagy still has a

couple more tricks up his sleeve. The game—if you look at it strictly as a CD built completely around photography—would be considered pretty good

but not much different than, say, **Heidi's Girls** or **Tabloid Beauties**.

However, by adding the ever important interactive factor, we actually get to learn a bit more about these beautiful creatures. I really have to hand it to the team that made this, because as far as disks based on photo interaction go, this is among the best.

When the colorful crystal interface (get it?) pops up, you can select one of six hot models—Shayna Lee, Sazzy Lee Varga, Jacqueline St. James, Teresa Langley, Danni Ashe, and Elizabeth O'Neil. It really doesn't matter who you choose, because every girl has an equally arousing profile. The cool thing about this game is that when you see the girl surrounded by crystals, you get plenty of choices of things to do. For example, some of the girls will do special poses for you, others will crawl towards you, and one will even do a flip across the screen—naked. Like that isn't enough, you also watch behind the scenes

footage of the actual filming, they tell you about their lives, they answer bizarre sexual questions, and you get to see a complete video portfolio.

Aside from Nagy's dick hardening photography, I personally enjoyed the crystal structured control panels. That may sound kind of stupid, but in the world of adult CD-ROM, where interfaces often have little to do with the "game,"

crystals look cool and are a lot easier to operate than those annoyingly shitty panels found on too many "interactive" linear

transfer CD-ROMs. Whoever designed this interface obviously had useability and looked at the top of his list. The images, no pun intended, are *crystal* clear, and very sexy. The sound is, like everything else, fabulous—the music could easily be excused as cheesy, but it is no worse than anything you'd hear at a tit bar.

You may find it difficult to believe that this CD-ROM is as good as it sounds, but it is. It's nice to see a company with so much talent actually put time into a product, so much that it shows. I am by no means bagging on **Tabloid** and **Heidi's**, but the interaction with those models is limited to fairly lame questions. Give MacDaddy a hand for finally proving that there's more to a

Jack into this crystal matrix.

product than just an idea based on a good photographer who used to date Heidi Fleiss.

The Maddams Family

In the ever-changing world of adult entertainment, one thing remains constant—the parody of existing mainstream films. Although it seems like a novel idea, most of these clever little

room that is supposed to be part of **The Maddams Family** mansion, and just like another Digital Playground game entitled **Vampire's Kiss**, your job is to click on different objects to catch a glimpse of the digitized film.

Seems pretty standard as far as interactive media goes, but the true shining stars of this CD are the actors, the sets, and the writing. The production values are quite high, giving the viewer an authentic gothic-castle experience.

Horner (**Shame**) plays Cortez, the man of the family, and devoted husband to lus-

ditties really suck. Remember *Bone Alone*, the film with that zany cover that looked strikingly similar to *Home Alone*? Most hopeful viewers probably expected Ron Jeremy to slap his hands against his face in that idiotic Macaulay Culkin fashion. Well, like most adult parodies, it was very lame porn.

Maddams Family is one of the few exceptions to this rule. As a matter of fact, I think that it is not only a decent interactive title, but the acting is fabulous and right on the mark. It is exactly what you would expect from brilliant veteran adult-star Mike Horner.

The game begins with a

Has anyone seen Cousin Tit?

cious Ona Zee (*Splatman*). The plot revolves around the **Maddams Family's** struggle to retain their fortune after the fall of the Soviet Union—apparently all of their money was invested in defense stocks. But sex, just like

They're slinky and they're kinky...

An ass-slapping good time in the Maddams' mansion.

war, offers great opportunities to make a buck. So the Maddamses turn their mansion into a whorehouse, lead by Madam Whoretisia (Zee), and supported by hilarious characters Uncle Pester (Ron Jeremy), and Cousin Tit (Charisma). Even though the acting is fabulous, the sex is average at best. It is safe to say that Horner and Zee steal the erotic

parts of the show, as Jeremy and Charisma, even though they are extremely funny, make odd sexual partners.

John "The Ass Slapper" Dough proves time and time again that he can deliver the goods. His reputation holds when we see him in a threeway fuckfest with Zee and Deidre Holland.

The trailer for **The Maddams**

Family, which is on a Digital Playground sampler, really sold me. It did not grab me in the same way as VCA's latest trailer for **Latex**. But it did give some validity to porn parodies. This disk may not be an interactive masterpiece with titillating twists and turns, but it is a good, fun, dirty disk that I am proud to have as a part of my CD-ROM collection.

Peepshow

Here is a title for the purely perverted among us who want to cut right to the hard-core, without a lot of filler.

Peepshow packs a lot of porn within a short distance of your mouse pointer.

The setting is a "virtual sex shop" with Shelves, Counters, and Cupboards, displaying various adult-wares. Here we find shelves of Magazines, racks of Videos, and a table chock

full of Blow-Up Dolls and Dildos of all kinds. Just point and click to check out any item in detail. You can browse through a couple of Magazines, showing various and sundry stills of fucking and sucking. On one page, a tiny video frame even appears and brings a scene to life. Clicking on the Dildos or the Blow-Up Dolls each cause a longer video to appear with a complete male-female sex scene. Other areas of the shop hold similar surprises.

But the main attraction at the back of the store is the peep-show booth. You enter and sit before the dark screen—with a miraculously endless supply of quarters at hand. Depositing a quarter in the slot causes the curtain to pull back and reveal an energetically gyrating stripper.

Eventually she will strip completely nude and begin to play with herself quite revealingly. And you don't even have to put in another quarter! But soon she asks, "Would you like to tip me?" Answer yes, and your open Wallet comes up before your eyes, with Bills of various

THANKS FOR CUMMING!

This is a pussy-lover's paradise—there is not a cock to be found within the peep-show booth.

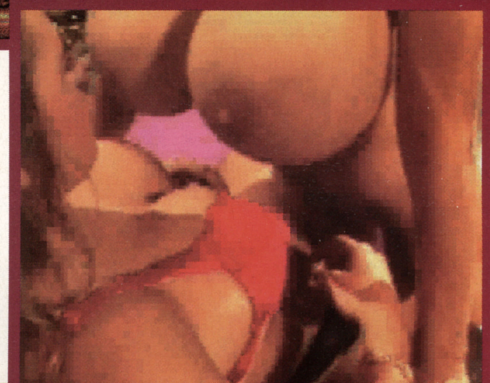

Ha—the old spread and snatch trick.

denominations sticking out of the top.

Click on one of the Bills, and a full-length video begins to play, featuring a different woman (or two, or three) in a more explicit scene.

This portion of the game is a pussy-lover's paradise—there is not a cock to be found within the peep-show booth. Five different videos

show solo and lesbian scenes, which include such delights as gigantic double-dongs thrusting vigorously in and out of juicy slits, chrome vibrators humming away simultaneously in ass and pussy, and a bit of role-playing involving a hot pink strap-on dildo. You

Please don't let them hurt me!

will see some nice close-ups of 69 and spread snatch. ("Now she fucks her with a finger, now two fingers, three fingers crammed into her cunt!" Ahem, excuse me.) And for all you big-tit fans out there, one segment features a couple of lovely ladies with enormous endowments. A little bit of something for everyone, I guess, but you will have to supply your own cum-shot.

Overall, this CD is quite cleverly done, with many small "detail" touches to add to the fun. Try clicking on some of the Credit Cards in your Wallet while in the peep booth for a bit of diversion—as if you needed it with such a show going on before you!

Virtually Yours II

Players of the first *Virtually Yours* may have found themselves

feeling a little ripped off at the end of the game, when sex seductress Monique decided not to take off all of her clothes. If I remember correctly, we did not even get to see her tits.

Well, the exploratory adventure continues in *Virtually Yours II*, and the game picks up where she left off. This time, boys, we get to see it all—talk about a feast for your eyes. Glowing Icon probably made a great decision by not baring it all in the first episode. I am not condoning their blatant market-scheme. But it was twice as satisfying

to see her this time than if she would have just stripped to the buck in the first CD. Think of it as a girl who does not kiss on the first date—but you are virtually showering her with semen the next time you get together.

The game starts with the same Holoroom, where you have to

watch a series of stock digitized video

they are wrong. There is an added feature that makes this game worthy of its release: An Evil Hacker has taken over the compound, and you have to find him. By exploring the rooms and sifting through a bunch of abstract clues, you will be lead to his dark lair. Here, you must fight a cum-shooting Penis Beast with your mouse. You then read through an ancient book to piece together the Evil

clips to get the beauty hot. Then as the movies pass, the clothes come off. Simple, but satisfying.

Many may think that this is the same game with nudity as an extra bonus, but

first episode did not even come close to delivering, and it is great.

Virtually Yours II is extremely fun—and you really get your moneys worth in sex. One thing that Glowing Icon should consider is getting rid of the promotional rooms. They are unnecessary, and take away from the game. In any event, this disk provides positive evidence that the adult CD-ROM market is headed in the right direction.

Venus' Playhouse

Venus' Playhouse is a fine example of a small time company making a big time product. It may not be *Seymore II*, but what is? And why should it be? This is an above-the-norm interactive game based on an exploratory environment. I will say that the cover quote, whether it is legitimate or not, that describes it as "the first erotic masterpiece of the digital age" may be taking it a step above what I saw on my monitor. But **Venus' Playhouse** is a damn good exploratory title—even though producers may need to get their mitts on some hotter girls with bigger names.

The game begins with you knocking on the door to Venus' house. She comes to the door and asks you if you would rather explore the Upstairs or the Downstairs. A word of advice—take the Downstairs first, because it leaves the Big Prize waiting for you Upstairs. After you select your starting point, you get to

choose between three major areas on each floor. On the first floor, there's the Kitchen, the Pool, or the

Dining Room. If you choose the Pool, you have three babes sunbathing, willing to have a naked water-fight in front of your eyes. If you choose the Kitchen, two babes who are cooking will put on a strip-and-eat show. Best of all, if you pick the Dining Room, you'll find an all-out ten-woman food orgy, with grapes and everything. The aspect that makes this game good is that you can actually choose what the characters in each of

We'll be your personal trainers.

these rooms will do for you. This isn't one of those lame games where they only programmed one path in each room. So if you think that one of the girls in a designated room is a hog—tell her to hit the fucking road. The first floor is action packed, but the best is yet to come.

Like I said before, play it smart and hold off on the second level because that's where the action heats up. The floorplan for the second story includes a Bathroom, Shower and Venus' Bedroom. These spaces bring to mind the beauty of hot, naked women covered in soapy water chowing each other's boxes. All three rooms on the second floor are great, but Venus' Room is easily the best. By playing it smart, you can get this hot, six-time Miss Nude Universe to fulfill your fondest desires. Believe me, she is a total fucking animal, and she is in slick

shape. So take the liberty of being an American and show her the stars and stripes forever.

Everything about this game came as a complete surprise to me, as I am sure it will to anyone who purchases it. The animations are groovy, the controls are nice, big, and easy to control. And there are dozens of different choices to make as the game rolls on. Remember folks, don't be fooled by packaging or company names, because this one is a winner in its own right.

Freaks of Nature

Did you ever want a monster cock? Or wish that when you were in line for brains, talent or good looks, you should have instead been waiting in the huge, long or awesomely strange member line? Well, if so, then this disk is enough to put you off that idea.

Freaks of Nature has a selection of cocks from your dreams—or nightmares—with names like Jughead, Mobi Dick or Double Dong. Or maybe you have imagined what it would be like to have a tongue like the frog on the Bud commercial? Yep, he is here too. Not the frog, but the tongue.

Of course, it could be that these are just the virtuoso stylings of Hollywood's greatest prosthetic special-effects artists, *not*! If we accept that this preposterous collection of surrealist male-meat is real, then the question is where do these guys get the blood to distend these deliciously deformed dicks?

Once you have chosen which of these monsters you wish to view, you get to select the type of kink action that you want to see these boys in. And the action ranges

from reasonably Normal Sex (if you can call sex with a guy hanging two cocks *normal*), to an orgy where King Tongue

takes it in the ass by a bevy of beauties armed with strap-ons. (Sorry, no S&M.) Other, pleasant features are the Blow Job, Sex and Cum-Shot buttons that allow you to jump Forward or Backward to these

Attack of the monster cocks.

Will someone please give Jughead a hand?

particular areas of the clips. This is not a new feature, but these functions are always nice to see. Oh yeah. Speaking of cum-shots, it is amazing the enormous amount of semen each of these guys seems to shoot. I mean, between blood for those twisted erectile tissues and cum, these guys must move into acute dehydration during sex. However, there is the possibility that if your member is this monstrous, most muff probably takes a powder. So

coming gobs for the camera is a lot easier if you do not do it that often.

Maybe that is what we learn from freak shows: Having our more normal short-cummings is not so bad.

Raunch

Picture this: A stack of 11 television sets just waiting to be turned on. Add to that the hottest adult lineup—Julia Ann, Francesca, Lacy Rose, Isis Nile, Debi Diamond, Raquel Darrian, Tabitha Cash, Tom Byron and Marc Wallace—who are all ready to turn you on. Now, digitize this fantasy, and you get **Raunch**, the horny couch potato-cum-sex-tech geek's channel-surfing wet dream.

That is right. **Raunch** is based on two of America's favorite pastimes—staying glued to the tubes and getting off. The interface metaphor is a heap of burned-out, black and white TV Sets stacked in a junky alley, and an adult Poster slapped on a wall. Click on the Poster and you are treated to a titillating slide show. Click on any of the TV Sets, and the screen comes alive with a colorful, raunchy sex clip that has Zoom, Slow Motion and Looping functions.

And most of these clips are pretty hot. Still, when you have had enough of T.T. Boy ramming Debi Diamond, you simply switch channels (okay, go back to the Main Menu) to watch Marc perform copulatory gymnastics with Tabitha in a stairwell, or Savannah (rest her soul) do a lesbian shower scene, or the outdoor antics of Tom and Raquel or an orgy, or—

It's a horny sex-tech geek's channel-surfing wet dream.

Well, you get the picture. This themed clip-viewer does not offer much that is new, but it does offer plenty of raunchy sex set to hard-driving

music. And perhaps that is enough. Hmmm, maybe now that the folks at Rom Antics have developed this intriguing engine, they could do something about offering us a different program lineup for every day of the week. I mean really, Tuesday night TV is really dull.

Nightwatch Interactive II

I saw a sexy cop, once. But security guards (not to belittle the profession)—well, have never turned me on. In reality. The original **Nightwatch Interactive** CD-ROM, which was released as the first “interactive” erotic movie in 1992, did a lot to promote the sexuality status of female security-guards. On my computer screen, at least.

Nightwatch Interactive II is

a visually improved variation on the sexy security-guard theme. But the interactivity does not pick up where the original disk left off.

Here is the set up. P.J. Sparxx (in all her digital lisping glory) is the security guard for an apartment/office complex. This complex has 15 rooms, each of which just happens to have two or more people going at it. Click on a Number, peep into the room. There is no specific goal, except for, of course, watching and wanking. Sure, between clips you

On the positive side, this disk does incorporate 15 different sex clips. A nice, healthy number.

Unfortunately, the rooms—with the exception of one room with three chicks going at it—feature two people per clip. Not to mention that there is no ass-fucking and, needless to say, no double or triple penetrations. Given the size limitations of the QuickTime™ screen, a little more heat in the sex department would have been greatly appreciated.

Superstars of Japanese Porn

Well, the Japanese have done it to us again. No, I am not talking about trade war

brinkmanship diplomacy, or beating us to the punch for cars, or toasters, or stereos, or movie studios. I am talking about the Mosaic Blurring Technology used on this disk. That is right, Mosaic Blurring. And guess what gets blurred! That is right, anything involving quim or cock disappears behind this pixel-a-poke screen of—well, blurring. In the good ol' U.S. of A. we would call this censorship, unless—Wait! Do you think that Japanese women actually exude a camera-distorting gas from their nether regions? Something to protect the inscrutability of their secret Asian charms? Or maybe it is a secret art of Ninjitsu taught to young Nipponese porn-starlets in the fastness of some holy mountain by a mean old Mama-San, who would make soup out of those sewer-dwelling turtles.

Naw, it is censorship!

In some ways, this disk makes you glad you are an American.

Politically and correctly speaking, the cross-cultural message is curious. Japanese porn dogs are really crying out for help. Their idea of great-looking gash is all square and blocky. I wonder if they are doing

a special pixilated version of the *Chasey Lane Signature Series* for export to Japan?

Oh, you so big!!

The censorship is a pity, as the sex on this disk (if it were fully visible) must be truly hot. Certainly the various

young women are beautiful and enthusiastic. Of course, they all make the little mewling sounds of a drowning kitten as they fuck. But then, I do not know that I would recognize somebody screaming, "Oh, you so big!" or the ever-popular "Come on my face like a hound from Hell" in Japanese. These would

make great subtitles though.

Overall, the ten girls on this disk are best viewed as cultural artifacts, rather than a keyboard cumfest. Perhaps there is an answer here for the trade

deficit. We trade the Japanese some nonmosaic porn for three or four skyscrapers in downtown L.A. Yeah, that's the ticket.

—Lee Michaelson

David CD

Before I get to involved with what a total "Baldwin" David Burrill is, let me just begin by saying that he is an arrogant snot. Now that I have that

off my chest, I can begin to tell you why I feel this way. To begin with, this CD seems more like an homage to his life than an interactive disk. For the entire first 15 minutes or so we get to see pictures of: David growing up, all David's magazine covers, and a lot of random pictures of David performing David's music. Why is this necessary? If I wanted to see all of this, I would have just looked through my own scrap books. Does hotshot David Burrill actually think that I care that much about his baby pictures. It was like a terrible chauvinistic episode of the *Wonder Years* with some miserable techno soundtrack—written (of course) by David. Grow up, Davy boy. You may be hot, but your not Mark Wallberg.

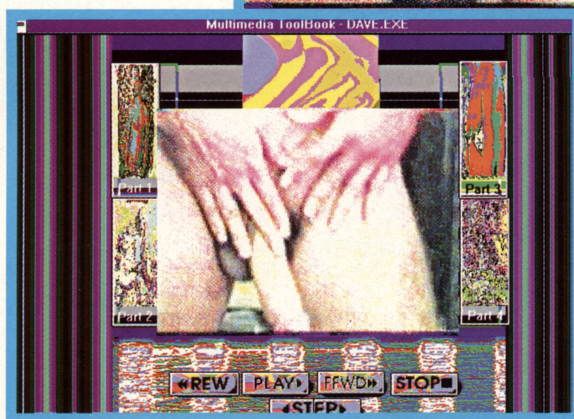

So, the first episode of the disk is a nice pictorial autobiography about David. The second episode, however, is the best on the disk. It is an interesting description of how Dave compares working on his scooter to sex. There are a couple scenes when he pours motor oil all over his body—and that could make even the most frigid individual melt. (I will say that David has a fair-sized penis, but it is not of John Holmes caliber.) The entire thing is fairly well choreographed from a porno standpoint, and it will definitely get your motor runnin'.

The third scene is more or less a lot of shameless promotion in the form of an erotic music-video. Not

much here except David singing a song about some girl. Your not kidding anybody, David. Anyone with eyes can see all the covers of the

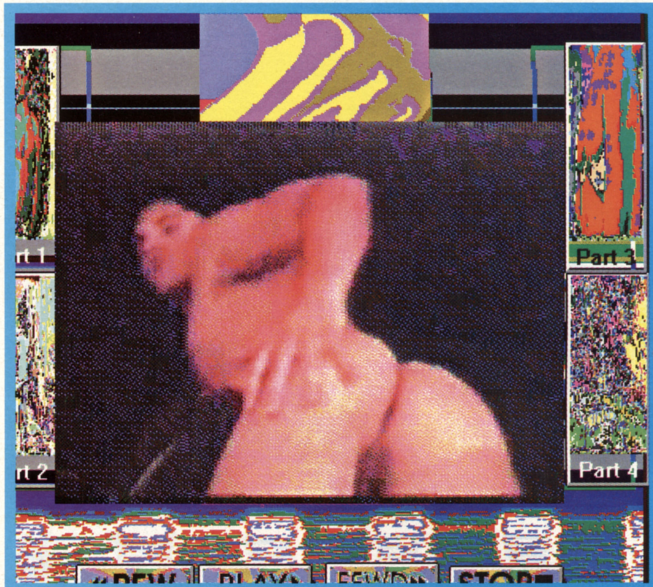

ment, when David describes what he likes to do in his free time. I don't know about you, but driving around in my car

What do
you like to
do in your
free time?

Advocate and *Out* that your beautiful body has graced. Oh well, that is our society for you—compromising your beliefs to take an extra buck. One good thing about his little video is the occasional ass-shot that he often flaunts. It's tight, but easily accessible by your computer mouse.

Scene four is simply an embarrass-

is about as thrilling as listening to Rush Limbaugh sing the blues. Sorry, buddy, nobody really cares that much.

Aside from the big motor-fuel demonstration, this CD really does not have that much to offer. The digitization is so-so, there are no real control-panels, and the graphics are about as advanced as Atari Pac-Man. David Burrill seems like an honest enough good guy, but with fifty or so dollars, I can find a more honest product to spend my money on.

Man Parts

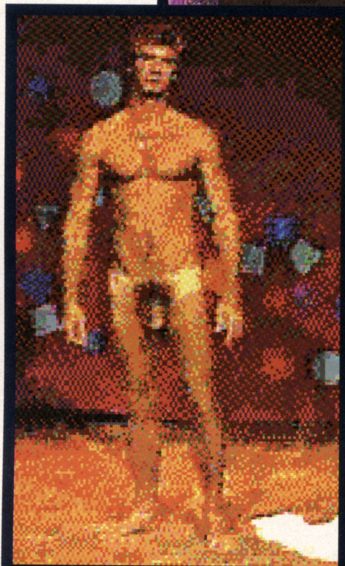

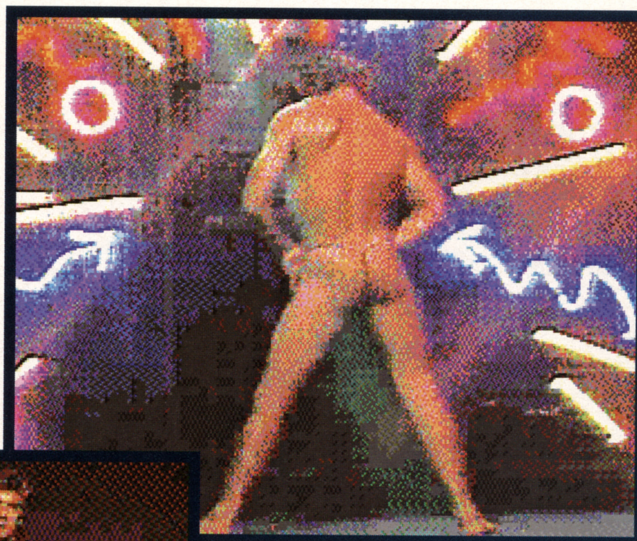

Hold on to your hard drive! **Man Parts** will thrust you to new heights of ecstasy.

This game of men for men (or for women who fall over Chippendale-style guys), fills your mind inch by inch. **Man Parts** teases you through puzzles, making you work to find your man—but not too hard. This interactive “Brain Game,” as Vivid Interactive calls it, is short on brains, but big on brawn. At least they have their priorities straight, or should I say erect?

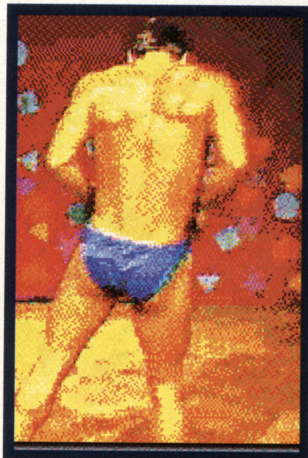

The game is simple. Solve a puzzle: See a sexy dancer. That's it! However, it can be adjusted to varying degrees of difficulties. The game starts in the main menu, where we see puzzle parts scattered on the screen. The pieces are covered with devilishly handsome men, waiting for you to choose them. In addition, there are three puzzle games: Jigsaw, Concentration, and the Maze. So, drag the man you want, into the game you want, and away we go.

To solve Jigsaw, take the separate parts of the man and put him together. Don't hurt your brain figuring this one out. The music is entertaining as you build your man part by part.

Concentration is simply turning over cards one by one, and trying to match them in pairs. But looking for the perfect fit is not as easy as it seems. Finally, there is the Maze. This one is the tricky puzzle. (Just guess what the designer had in mind.) Somewhere on the screen is a man and his membership meat. The

A
good
man is
hard to
find.

idea is to pull your eyes off the guy long enough to carefully move from one space to another, gradually getting closer to him. If you move onto the wrong space, you might end up moving further away from your man, so be aware. Don't get “testie” if you don't get it the first time around.

Do the puzzle, and the computer does you. Pitcher or catcher, the computer sets you up with a private dancer. Video erupts as you leap into a small theatre and take a front seat. Should you be lonely on a farm, Hank the

Cowboy can relieve some of those after-dusk blues. (And by the way, the Cowboy looks like Peter Brady, for those of

you with *Brady Bunch* fantasies.) You can join the army and parade with Steve the Marine, while he marches right up your stiffy. Let Nick the Boxer knock your cock off, as he rips the gloves off with his teeth. For you California dreamers, there is the ever-sweaty Rob the

Surfer. Then, there are video clips of men working out, flexing, and

wiggling in the wind. Keeping in the spirit of the game, the interface is pretty basic. There is a speedily accessible safety-screen, in case you get caught red-handed with a fistful of cock. In the end, **Man**

Parts delivers some great dancing to your private room via some simple brain-games.

The Rise of the Roman Empress

I must confess to having a certain admiration for this CD-ROM's star, La Ciccolina, and not merely because of her self-evident—and prodigious—talents in the fields of fucking and sucking and being licked and dicked. In her time she's been a highly visible Member of Parliament in her native Italy. And while in office she used her national fame to advance a cool political agenda that exhorted the electorate to go naked in the world, be nice to cuddly animals, and generally work for improvements in the environment and in human-sexual relations.

She's more than happy to bare her breasts

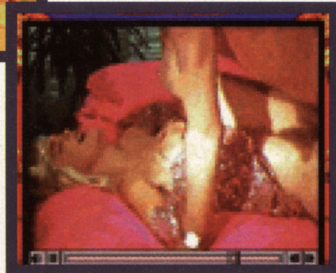

in public or even in the parliamentary chamber (top that, Nancy Kassebaum!) and wasn't afraid to go head-to-head with needle-dicked old reactionaries like the Pope himself (head-to-head? Maybe she should just give him head!). In general, it's very hard not to conceive of La Ciccolina as a force for good in the world. She's also unique among former actresses who've entered politics.

Let me digress for a moment. (To get to the review, jump ahead to the next paragraph. For a little historical perspective, read on.) Who else can she be compared to? Well, there's Jiang Qing, who made a name for herself as an actress in the '30s before she became Madame Mao and later one of China's Gang of Four. Her involvement in politics was indirectly responsible for the deaths of millions of people in the Cultural Revolution of the 1960s. Two-time Oscar-winner Glenda Jackson quit acting in 1992 and was elected to the British House of Commons, and Melina Mercouri, who played a happy hooker in the 1960 movie *Never on Sunday*, later rose to

become Greece's much-beloved Minister of Culture.

La Ciccolina differs from Mercouri in that she's really sucked and fucked about 40 miles of raw dick in her time, and I bet working on the Lord's day isn't a problem either. She has a less impressive acting talent than Ms. Jackson, but compensates with a considerably higher degree of babaliciousness (in spite of her rather garish makeup and pronounced Baby-doll features). In addition, it's unlikely that she'd ever sanction any ideologically fanatical

program of executions, assassinations and social upheaval like those Little Red Book-waving loonies in The People's Republic. She knows you can't save the people with Mayday Work Farms and State Reeducation Centers. If she has a coherent political program, it's more likely to adhere to such notions as Peace, Bread, Work, Freedom, Equality and International Brotherhood—all spiced up with a program of free blowjobs for the masses and state-subsidized orgasms for all. No wonder she gets reelected by a landslide every time.

My apologies for the delay. I won't detain you longer. **The Rise of the Roman Empress** is little more than a digitized porno movie. Double-click on one of the nine images on the Main Menu, and you'll be able to watch the

scene in question. Thrill as the honorable member lowers herself on to any number of dishonorable members, each wielded by some European porn-warthog. Gasp in amazement as she inhales dicks bigger than her forearm (or Popeye's, for that matter). Glenda Jackson

may have won Emmys and Oscars for her performances, but you'll probably never get to see her being doubly penetrated as she simultaneously gargles a pint of EECemen. (Surely I'm not the only person in America who finds double

penetrations about as erotic as Med-school footage of a Heart/Lung transplant. OK, maybe I am.) Within each clip you can Fast-Forward, Rewind, Pause and Play—and that's it. In fact, this disk is about as interactive as a microwave oven. And I'm pretty sure that a solid majority of American masturbators would prefer to jerk off on a couch holding a remote in front of a TV than run the risk of ejaculating all over their expensive keyboards.

Hey, it's just a theory. La Ciccolina herself would go to the people on a matter of such crucial importance. Imagine that plebiscite—All ratings apply to the CD-ROM: The lady gets 100%.

So what can I say that hasn't already been said about **Justine**? I mean, let's be honest, this film has it all. Hot steamy sex and sex and sex. Great performances. A story about a father and son searching for that special women. And a

sense of drama that few other porn films ever even attempt to achieve. Let me also applaud the notions, like cross-cutting, that rarely show up in adult movies. Arcus' presentation of **Justine** has been nicely put together using the chapter metaphor. In fact, this is an excellent version of the film in a digitized format.

Plan 69 From Outerspace

After last year's mainstream film about the life of Ed Wood directed by Tim Burton, people may be interested in seeing this infamous film's most popular porn parody, **Plan 69 From Outerspace**. It is an extremely funny, antic-filled, fuckfest with all the right moves. Sexy made the right move in getting their mitts on this title for release on CD-ROM. Sure, Burton's biography is destined to be a hot number. But Sexy also acquired the rights to some footage from the original **Plan 9 From Outer Space**. The combination of the two films is a little shakey in parts—probably because one was shot on black and white film and the other was

shot on color video, but it is funny and effective. High points of the porn version—any film with a trademark Pete North cum shot is always a winner—and any film with the brilliant acting abilities of a one Mr. Woody ("Matahari, this better be important...") Long This has to be the work of

a genius. Speaking of Woody, he is hilarious as the evil space alien—he alone is worth the price of this CD. But be careful, this spacey disk has been known to crash.

Sex Over 40

So, what exactly does an adult CD-ROM have to offer me on this most timely subject? In *Sex Over 40*, unfortunately, very little. (Perhaps this title is more meaningful for men over 40. You know, men who feel guilty fantasizing about women who are the same age as their daughters.)

In any event, I think if we are still interested in having any sex by the time we reach 40—and who wouldn't be—we need the complication and depth that games and fantasies can create for a more fulfilling and stimulating experience.

In this case, the suggestive title was the most stimulating aspect of this CD-ROM. The program's interface is a simple, user-friendly six-option selection process where the digitized film can be accessed much the same way as watching video—only it costs more. However, I did find the Fast-Forward option a bit titillating. The frame action created a bizarre counterpoint to the staccato sounds of grunting and panting.

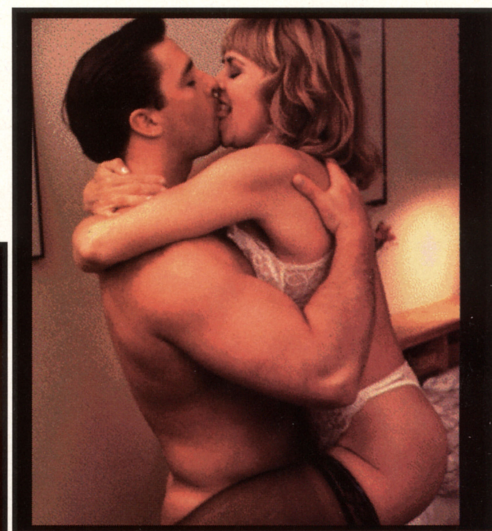

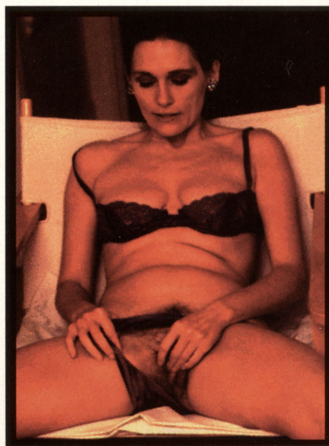

Sex Over 40 consists of six, 10-minute options. One is a clit book of 20 stills. Two more are run-of-the-mill bump, penetration and grind video-clips (been there, done

that). Another clip is a lame four-some. And the last two open with testimonials that had me wondering if I was watching some 12-step hybrid:

"Hi, my name is Linda, I'm 44 and I love to masturbate."

This is like a primary on shaved pussy, sans fantasy, which may interest the pre-teen lusts of oedipal youngsters. But for those looking at—or for—sex over 40, who see our sexuality like a fine wine that develops with age, this title offers up Ripple, when the market for *Stag's Leap* is more in order.

My advice: Rather than buying *Sex Over 40*, ask the salesclerk out for a drink. It's

a lot more interactive, and hell, if you don't get lucky, at least you won't be thirsty.

Tami and Friends

When I first picked up this CD, I was under the assumption that it was a disk about **Tami Ann and Friends**. That was simply just one mistake that I was going to have to live with, and regret for the rest of my years. Actually, this is a disk built around the pastime capers of Ms. Tami Monroe, who, despite owning a set of unbelievable, enormous fake breasts, is a good fuck with some cool pals. The main gripe with this disk is that anyone could make a CD like this, billed with any name, followed by "friends." And I am sure

that your so-called friends will be willing to fuck for some money. Nobody ever said that making your way into the secret lives of Tom Byron and T.T. Boy was really difficult when you have a couple hundred-dollar bills lodged between your breasts.

This is, however, a fun disk, and it features some exceptional sexual hijinks. The interface is a little poor, but it is just digitized film. There is no real reason for Zane to waste time with three-dimensional graphics when the main point is just to make money off of a reshaped, but good, porn title. It is a winning situation, and in this CD's case, it is a four-star

linear transfer. Tami is complemented by an all-star cast that includes the sultry Bridgette Aime, and the picture-perfect Mona Lisa.

Elements of Desire

Hot girls, awesome sex, and a well-directed story usually equal a CD-ROM that is well worth your money. However, when the viewing screen is miniature, the digitization is weak, and even the photo-still section looks kind of cheap, you feel kind of shortchanged. Maybe it is just me, but without these essentials, I find myself wanting to go out and rent this film, just because I think Julia Ann is so hot. One really good thing about **Elements of Desire**, which cannot be taken advantage of unless you have a souped-up speaker system on your computer, is a really interesting soundtrack. As a matter of fact, when you play track two of the CD-ROM, you can listen to the **Elements of Desire** theme tune.

scenes called something like Tarot or Industrial. The imagery is beautiful, and the director should be complimented

on his eye for hot and steamy scenes. It's just a shame that I felt like I was watching it on a Watchman that is five blocks away from me.
